Two telecommunicators started last week leaving one vacancy to fill. An Emergency Medical Dispatch (EMD) software vendor has been selected and contract negotiations have begun. Implementation will take approximately six months. The P25 Motorola Radio Network project is slightly behind due to permitting issues. Permits were recently approved, and the project is moving forward again.

2. City of Aurora

Aurora will follow up on the status of replacing former ETSB board member Ken Van Andel. Aurora is currently building a P25 radio tower and testing Pervis and Hexagon, and recently launched it's Mark 43 CAD/RMS software.

3. City of North Aurora

North Aurora is preparing for Mark 43 sandbox testing at the end of September.
