Dear Zoning Commission,

I am sending this letter in opposition to what is proposed by Lincoln Properties to build 90 RENTAL Townhomes off Plank Road and Tuthill in the zip code 60563.

We do not need more rental properties in this zip code. As can be seen by my attached

Realtors report, this zip code has 46% rental units which is more than any other area by 20%. Please see attached, 2nd page.

It is my understanding that more rental units have been approved off Diehl Road, which makes more sense. This would not cause safety concerns of congestion like the Plank property.

After visiting the open house that Lincoln property held at the Naperville Library on Wednesday, March 26, 2025, we learned that these rental units would be \$5,000-\$6,000 a month.

We were also told this would be an over 55 active adult area. If this were true where are the amenities for these residents? Maybe the usual club house, golf, pool etc, etc.

We do not feel this is the transitional area that attorney's want to use to get something like this passed by the zoning board. Just because it could be built, should not mean that it is in the best interest of this Naperville area.

As you know this area is very congested due to the day care, Costco and 7-Brew.

7-Brew is an issue in itself, but I feel the reason for the success of 7-Brew is the 46% rental units.

With what is proposed and already approved, we will be over 50% rental in zip code 60563. Another issue that area residents feel is the fact that Lincoln Properties is a national company and builds across the United States. They come and build, make their money and leave. They do not need to live with the negative circumstances that such a product would bring to the area.

One neighbor's child goes to Beebe school and says that school is already overcrowded. The playground they propose is in an unsafe area next to Plank and too small.

The area residents would like to see single family homes, probably similar to Burlington Subdivision.

Would Naperville be opposed to buying the property and turning it into the Park District with tennis courts and a basketball court?

Thank you for reading our thoughts,

Ellie Stevens

Good Morning,
I am enclosing a photo of an accident that happened on 4/13/2025 at 5pm Sunday.

Please make sure that zoning understands that the proposed townhomes would make our residential area become a commercial thoroughfare.

Thank you
Ellie

Proposed Construction of 90 rental unit town homes
at the intersection of Plank and Tuthill and
on Burlington Ave and Tuthill

To Whom It May Concern:

The proposal for the development of a 90-unit townhome rental complex has sparked considerable debate and opposition among community members. While the project aims to address housing shortages and provide modern living spaces, many residents and local stakeholders have expressed concerns regarding its impact on the community's character, infrastructure, and environment.

One of the primary concerns voiced by opponents of the development is the potential alteration of the community's established character. Longtime residents fear that the influx of rental units might lead to a transient population, disrupting the tight-knit, stable nature of the neighborhood. The development's modern architectural style has also been criticized for not blending well with the existing historical aesthetics.

The community's infrastructure is another critical point of contention. Opponents argue that the local roads and utilities may not be equipped to handle the increased demand that comes with a higher population density. Traffic congestion, strain on water and sewage systems, and the need for expanded public services are among the infrastructure challenges cited by those opposed to the development.

These rental units will not benefit our community. This area has already been burdened with increased traffic from 7-Brew and Costco.

I think everyone knows about the traffic issues from 7-Brew since the police department has been out several times.

Naperville granted a variance to the 7-Brew site, not requiring a 3rd lane to bypass in the event of an emergency. The 3rd lane would not solve the traffic issue, which goes around the block at times. When this happens, you cannot go south on Naper-Wheaton Road without crossing over to the wrong side of the street. However, if this variance were not granted, they may have chosen a more desirable location to open their franchise.

The neighborhood would like single family homes in this location. This would develop the area and bring tax revenue to Naperville without making these roads a commercial traffic thoroughfare. The rental nature of rental units might not contribute significantly to long-term community investment and stability. Furthermore, there are concerns that rental prices could

rise, leading to affordability issues for existing residents. We were told at their open house that the rentals would be \$5-\$6,000.00/month

In a conversation with the developer, they expressed that building single family homes is not profitable enough for them. (Why is that our problem?)

They said that no one would buy this property to build single family homes in this location.

This is not true. Builders are available to build single family homes here. I would be happy to spear head this option.

They said, no one would buy homes in this location. Again, we do not believe this to be true.

A couple examples are the beautiful homes that back up to Naper Blvd on Larsen Ave. and 100% occupied. The other example is the Pulte Homes that are at the intersection of

Naper Blvd and 75th street. That location is 100% occupied with beautiful homes.

This location is much busier than the location in question, with 8 lanes of traffic.

Our zip code 60563 has more rentals than any other area in Naperville, DuPage County and Illinois. Approximately 20% more. This information provided by Realtors Property Resource.

We already have rental townhomes being built on Bauer and Mill Street.

Prosperita has 76 townhomes soon to be constructed on Diehl Road and Mill St.

The new project on Diehl & Freedom Dr. will offer more rental/sale units. This location makes sense.

Our area would benefit from single family homes on the Plank property. It would be helpful to have some single- story homes for our aging population to stay near their families.

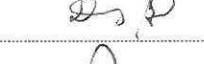

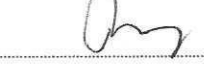

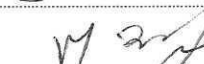

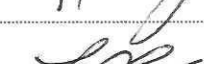

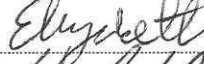

Single family homes would balance growth with the preservation of the community's values and well-being.

Sincerely,

Ellie & Greg Stevens

Personal addresses and phone numbers were not redacted from the following public comment at the request of the submitter, Ellie Stevens.

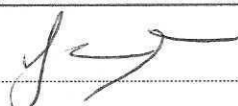

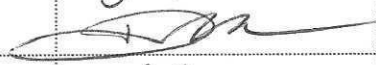

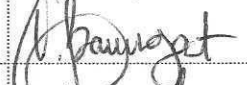

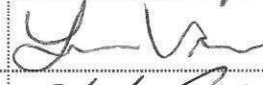

Purpose: This petition seeks to garner support for single family homes on Plank Rd and Tuthill RDS and along Burlington Ave in Naperville 60563. The new proposed building by an out of state developer for 90 rental townhomes with rent of \$5-6,000 does not serve the area as far as congestion and long term safety and sustainability.

Thanks, Adam. Yes, I have a few comments on the proposed development that I would like to be shared with the Planning and Zoning Commission.

1. Tuthill Road and Plank Road are narrow and in poor condition, posing safety risks for drivers. Vehicles often drive down the center of Tuthill Road, adjacent to the proposed development, hindering two-way traffic. Visibility is also compromised by a large hill at the intersection, especially in winter. The area lacks sidewalks, making walking and biking unsafe. Significant improvements, including widening the roads, enhancing visibility, and constructing sidewalks, are essential to ensure safe vehicle and pedestrian traffic.

2. The proposed park adjacent to Plank Road presents concerns due to traffic volume and vehicle speeds on Plank Road, which can exceed the speed limit as drivers attempt to make the light at Plank Road and Naper Blvd. This makes it an inappropriate area for children to play safely.

3. The opening of 7 Brew and Costco has led to a significant rise in traffic, causing issues for drivers on Plank Road and Tuthill Road, especially those needing to access the local school (KLA Naperville). Residents south of Tuthill Road face challenges exiting their neighborhood at peak times of the day due to the traffic on Plank road and north Tuthill Road.

4. Runoff water and drainage are issues for downhill neighborhoods from the proposed development. Naperville directs water to a retainment pond off Frances Ct, which has overflowed and caused local damage over the years. The neighborhood HOA maintains the area around the pond but faces yearly damage and soil erosion from rising water levels in spring and summer. Water from the new development cannot be directed to this pond.

Thanks for listening!

Chad Vargo
Local Resident

To allow the proposed development to proceed, **a left turn lane and left turn signal on Naperville-Wheaton Road northbound at Ogden** must be added.

This plan creates a HUGE traffic issue traveling north on Naperville-Wheaton Road as well as Tuthill Road. With no left turn lane or left turn signal northbound on Naperville-Wheaton Road, cars going straight or turning right pile up, quite often not making it through the green light. The added traffic in past years from Aldi's, Starbucks and the 14 houses built on Burlington and Declan has significantly worsened the northbound traffic. Without a light at Tuthill Road and Ogden Avenue, anyone from the proposed development headed north would likely use Naperville-Wheaton Road. It is extremely hard to turn left onto Ogden from Tuthill and almost impossible to turn right and cross lanes to turn left/north on Naper Boulevard given Tuthill's proximity to the light there. 7 Brew Coffee has recently added enormous traffic to Iroquois Avenue and Naperville-Wheaton Road as well, with cars lining the road on Iroquois all the way down to Naperville-Wheaton Road and around the corner. Sometimes two-way traffic on Iroquois is impeded by the line of waiting cars as well as the many U-turns done in the street. Adding 90 additional families without any northbound traffic support will be disastrous.

The best option to support the existing northbound traffic, along with additional traffic from the proposed development, would be to **add a left turn lane and left turn signal on Naperville-Wheaton Road northbound at Ogden**. If that is not possible, no left turns should be allowed at all, forcing left turns at Naper Boulevard or Iroquois Avenue. Not allowing left turns at Tuthill onto Ogden would also be a good idea, so people can get onto Ogden headed east. If the intent is to have the added traffic from the 90 families use Plank Road to exit, I don't see how that could be enforced. Adding traffic to Plank eastbound probably suggests a need for a right turn lane onto Naper Boulevard.

I sincerely hope the traffic situation is addressed properly. The current situation CANNOT support the additional traffic from the proposed development.

Dear Members of the Naperville Planning Commission,

I am writing to express my concerns regarding the proposed development of townhomes and rowhomes in the vicinity of Plank/Burlington/Naperville Roads. As a homeowner in this area, I have witnessed firsthand the increasing traffic congestion, particularly due to the new 7 Brew business. The addition of approximately 100 new residences in this area will further strain local infrastructure and negatively impact the current residents.

Key Concerns:

Increased Traffic and Congestion

- A large influx of residents can overwhelm existing roads, leading to increased traffic congestion and longer commute times.
- The stoplight at Plank Road and N. Naper Boulevard already backs up significantly, often requiring motorists to wait through multiple light cycles before proceeding. Residential development with potentially 100+ additional drivers will only worsen this issue.

Strain on Infrastructure

- The new residents will place additional demands on existing infrastructure, such as schools, utilities, and public services.
- Overcrowding in local schools could become a serious concern, affecting the quality of education for current and future students.
- Increased demand on water and sewer systems may lead to potential strain, requiring costly upgrades and maintenance which will impact taxpayers.

Change in Neighborhood Character

- This development will alter the aesthetic and character of our community.
- The influx of new residents with different demographics and lifestyles may lead to social changes and potential challenges for existing homeowners.

Property Value Concerns

- Can negatively impact the area property values.
- Increased congestion and infrastructure strain may make the area less desirable for future homebuyers, potentially affecting long-term property values.

I urge the Planning Commission to carefully consider the impact of this development on traffic flow, infrastructure, and neighborhood character. I respectfully request that a thorough traffic and infrastructure study be conducted to assess the effects of increased residential density in this corridor. Additionally, I encourage the Commission to maintain the current zoning and keep the lots as individual homeowner residences, not multi-unit/family.

Thank you for your time and consideration. I appreciate your commitment to responsible urban planning and look forward to your response regarding this matter.

Sincerely,

Stacey Cizek
