Dear Riverwalk Commission,

Thank you for sharing details about the Draft Riverwalk 2031 Master Plan. We were pleased to be invited to view the presentation and share our thoughts and suggestions about the projects.

As we discussed, the College would like to incorporate an additional project in the master plan that would focus on a multi-purpose path, potentially accommodating bicycles, along the east side of the DuPage River from the Bambule Riverwalk Gateway on the north to Hillside Road on the south, all on North Central College property. This path would offer our students and the public an additional friendly connection along the river engaging future College use in the undeveloped areas on our south campus. By adding this path to the master plan, we could work alongside the Commission to develop a strategy to allow for this future element on the Riverwalk.

North Central College has enjoyed a good working relationship with the Riverwalk Commission. As a long-time neighbor, North Central College is happy to endorse the master plan document and is looking forward to continuing the partnership that we've valued in the past.

Best regards,

A handwritten signature in blue ink, appearing to read "Troy D. Hammond".

Dr. Troy D. Hammond
President
North Central College
