Re: Karis Critical Data Center

Dear Mrs. Laff,

At the November 5, 2025, Planning & Zoning Commission hearing there was significant resident testimony regarding health impacts associated with data centers. Most of the testimony was not specific to the proposed Karis Critical Data Center but focused on general information associated with other data centers around the country.

In response to the general information offered by residents, I would like the opportunity to offer a witness who will testify to the regulatory framework and air permitting associated with emissions specific to the proposed Karis Critical Data Center. I would like to present Brian Goldman, an Environmental Systems Engineer with ALL4. I believe Brian's testimony is important to address misperception of impacts associated with the back-up diesel generators associated with the Karis Critical Data Center.

Sincerely,

Russell G. Whitaker, III
