I read that the Naperville Planning and Zoning commission is recommending to proceed with citygate west. There is no resolution to what happens to 204 schools in north Naperville.

I have a 4th grader at Brookdale elementary with over 30 kids in her class, that is absurd. My 8th grader at Hill had over 35 kids in an accelerated math class last year. Brookdale, Hill and Metea are at or near capacity. Kids who live in the brookdale subdivision have had to be bussed to other schools rather than walk to their neighborhood school due to capacity issues.

We all know the estimated number of new students provided by the developers is way low. Just look at recent developments in the area where the actual number of new students has been 4 times what developers have estimated.

There is nowhere to expand at Brookdale school. Kids shouldn't be forced to be bussed to schools when they have one down the street. Brookdale shouldn't have to go back to having art and music classes in partitioned sections of a gym stage because there are no more actual classrooms.

204 has done a terrible job of estimating capacity and number of students, this complaint doesn't excuse them. Obviously they have wasted classroom space in south Naperville, not enough space in north Naperville and Metea should have been built for a much higher capacity. But regardless of those mistakes, the city, developers and district should come up with an actual, realistic plan to address school capacity rather than just blindly approving everything knowing this is a huge problem that is only going to get worse.

As I said in my original email below, I'm very supportive of most new development or re-development of depressed areas. But the school issues need to be addressed.

Thank you,
Mike Penich

On Aug 18, 2020, at 6:08 PM, Mike Penich [REDACTED] wrote:

If school capacity was not a concern, I would be supportive of this and most other developments in Naperville. But there is no way district 204 can accommodate this new development when Brookdale, Hill and Metea are at or close to capacity. I have kids at Brookdale and Hill, next year I'll have one at Metea and so I strongly oppose this development.

Brookdale had to move students to another school **outside of their own neighborhood** a couple years ago due to capacity issues. So until the district can figure out a solution for school capacity on the north side of Naperville, this and other new high density developments should be rejected.

We all know the new student estimates as a result of this and other developments are significantly underestimated, so please prevent this from moving forward.

Thanks,
Mike and Abby Penich
Brookdale Neighborhood Residents

Good morning -

As a parent of a 7th grade student at Hill Middle School and a senior at Metea Valley High School, I am writing to **strongly** oppose the 410 residential apartments that are part of the proposed CityGate West Development.

These high-density residential apartments will push my children's schools over student capacity. This property should be developed for business, or rezoned and developed with age-restricting housing that would not generate students for District 204. As a resident of Riverbrook West, I have no doubt our neighborhood would be one of the first to be rezoned if this development is approved.

It is time to protect our schools and hold firm to **opposing** developments in Naperville that would add additional students to District 204.

Regards -

Kelly M. Hensley-Hill

I, along with many other neighbors in Brookdale, strongly oppose the CityGate West Development, for the following reasons:

- 1) This 401-unit development will surely generate more than the 31 students the developers estimate
- 2) North-end D204 schools are at their full capacities and would require a boundary adjustment in order for these students to attend
- 3) Concerns on the balance between estimated development revenues vs. the cost to educate the students who live there

To: Naperville Planning and Zoning Commission
Re: Opposition to CityGate West Development

Dist 204 schools do not need more students. And 204 residents certainly do not need our taxes to go up to accommodate new developers getting wealthy by sponging off our tax dollars.

CityGate West would require alternation of school boundaries for our neighborhood – Brookdale and North 204, in general. Our Brookdale neighborhood kids OUGHT to be able to go to our neighborhood schools: Brookdale and Hill. This is why we chose to purchase homes in this neighborhood.

CityGate West’s prediction of adding only 31 students to our schools is a deceitful under-estimate.

As a resident of the Brookdale neighborhood and Dist 204 as well as a taxpayer .. I OPPOSE the CityGate West development.

If the development is “adult-only” or “seniors-only”, I would alter my objection.

To the Planning and Zoning Committee,

I am writing to officially express my opposition to the proposed CityGate West development. The planned residential housing in this new development would put undue stress on our already taxed, at-capacity district 204 schools, including Brookdale Elementary, Hill Middle School, and Metea Valley.

As a parent of Brookdale students and a resident of the Brookdale neighborhood, I am asking that the Committee reconsider the decision for the following reasons:

(1) We cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity. This is a case of a greedy developer that knows they can lease apartments in a highly desirable school district, which will negatively impact schools, and would have a negative financial impact on residential property taxpayers and District 204.

(2) The student generation tables used by the City of Naperville are 30 years old. Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential

development. District 204 has been working with the City of Naperville to update the generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy, and won't happen before the approval of this residential development. District 204 has experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! (This would considerably short the district on what it requires to educate the students generated from this residential development.)

(3) District is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity.

(4) We **can** support this property being developed for business, or rezoned and developed with age-restricting housing. Age-restricting housing would not generate students for District 204.

(5) In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204.

We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents, especially given all of the new challenges that every teacher, administrator, parent, and student is facing with COVID-19.

Thank you for your attention and consideration.

Sincerely,
Noelle Bathurst

Dear Planning Commission and City Council Members,
I am a 13 year resident of the Brookdale neighborhood. Our schools in this part of the district are already beyond capacity. Please do not allow any additional residential developments to be built that would feed into Brookdale Elementary, Hill Middle School, or Metea Valley High School. To do so would be absolutely irresponsible.

Thank you for your consideration.

Hi. My name is Michelle Boice and I have been a Naperville resident for 21 years on Downing Court and a voter in every election, in which I pay careful attention to the city council voting record. I am encouraging you to decline the current plan from the developer for CityGate West. No more residential apartments should be approved. This would create a tremendous student population burden on an already at capacity school district for the schools serviced by this area (in which I live) Brookdale school, and Metea Valley High This plan is short sighted and will eventually raise property taxes to the current residential property owners and provide less for our schools. If the plan is amended to age restricted senior citizen housing, this would be a fair compromise, but I encourage you to decline this and either approve this only for commercial Business or age restricted housing Thank you Michelle Boice

Hello:

I am writing to oppose the proposed CityGate West development of 410 residential apartments in a commercial area attending schools that are already at full student capacity. I do not think kids currently living in Longwood and Brookdale subdivisions and in walking distance to a school should be getting bused to other schools and redistrict due to overcrowding, yet this plan has no new school to support the load that it will place on an already maxed out school district. It is irresponsible and a burden on all of us. I am FOR low-cost housing, and would welcome a development of single-story ranch type homes for our aging community to downsize into and have age-restrictions to ensure that the schools are not burdened by the high density of the proposed development.

I know this is an issue that has been examined before and there have not been any schools added to the north side, so I hope common sense prevails and that the mayor, city council and Naperville Planning and Zoning Commission all oppose developments in Naperville and Aurora that would add additional students to District 204. We need the city to remain consistent with their past decisions and commitments. The city leaders speak highly about education, so it's time to protect our schools and residents by not allowing the current CityGate West development proposal to get the green light. In the COVID-era where educators are already forced to pivot quickly, the responsible decision is not to add more schools to support this development, it is to prevent a flood of school-age children from entering the city with projects like this and address ventilation and other improvements that need to be made in the existing schools and the existing classroom loads.

Thank you for your consideration,

Melanie Parker

To whom it may concern,

The development proposal for 410 apartments in a commercially zoned area will have an adverse effect on my children's education. I oppose the zoning change for residential use that will put Brookdale, Hill, and Metea schools over student capacity. These three schools are already at capacity and this would put even more strain.

In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. We need the City to remain consistent with their past decisions and commitments.

To whom it may concern,

It has been brought to my attention that the city council is being asked to approve residential zoning in the area that would affect district 204 schools, Brookdale, Hill, and Metea. I question the necessity and the wisdom of overburdening schools serving the northwestern portion of Naperville. It would be extremely hard to maintain the Family Friendly designation if prospective homebuyers and potential employers hear that children are being placed in hallways during class time because the classrooms are over capacity. My children have already been negatively affected by the inadequate student generation tables currently in use and I expect that the Naperville city council would see the wisdom in turning down this rezoning request. I attended Brookdale as a child in the 80's and now have a child attending Brookdale and the impact overcrowding has had on the students is significant and cannot be overstated.

Thank you for your time,

Jessica Doucette

I live in the Brookdale neighborhood near CityGate and oppose this development for new housing for an already overpopulated school system and area. Here are the points that need to be considered.

We cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity. This is a case of a greedy developer that knows they can lease apartments in a highly desirable school district, which will negatively impact schools, and would have a negative financial impact on residential property taxpayers and District 204.

(2) The student generation tables used by the City of Naperville are 30 years old. Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential development. District 204 has been working with the City of Naperville to update the generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy, and won't happen before the approval of this residential development. District 204 has experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! (This would considerably short the district on what it requires to educate the students generated from this residential development.)

(3) District is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity.

(4) We can support this property being developed for business, or rezoned and developed with age-restricting housing. Age-restricting housing would not generate students for District 204.

(5) In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

Hello-

My family and I absolutely love Naperville. We are grateful for the community and accessibility and the schools and for the growing diverse population.

We would love to see a development with hotel, shopping, etc. go in where the Citygate West plans are proposed to happen.

What we are opposed to is adding more residential area at that location - apartment or otherwise – which would add more students to the already crowded schools that my kids go to.

We love May Watts and Hill Middle School and Metea high school... we have children at each of the 3... and do not want to see class sizes grow larger or boundaries change!

I am confident that I speak for many of my neighbors and fellow parents in the district.

Please do not zone this for residential unless it is age restricted. Best of luck – thank you for hearing my concern.

Kristin Larson

I am a resident of Naperville and have two children currently attending IPSD 204 (Brookdale Elementary and Hill Middle School). Over the years, I have attended board meetings, PTA meetings, zoning meetings and parent meetings about the current and future overcrowding at Brookdale, Hill and Metea. This is obviously a concern for my family. I have had two children in Brookdale and watched the overcrowding get to the point where teachers were losing classrooms in exchange for "carts" and where children were learning on a gymnasium stage. My youngest daughter has over 30 kids in her classroom since 1st grade. We have TEMPORARILY re-routed children to school further away bc the district and school board was unable to create a long term plan on reducing overcrowding in the northern most schools. Children are busing to school when they live in walking distance of their local school bc we have an overcrowding issue.

The idea that we would build additional housing to increase the number of students GUARANTEES not enough room in these schools. It GUARANTEES overburdened teachers, negative financial impact and children who get less than. You will be negatively impacting this district, every teacher and every student.

The city's tables are over 30 years old and not representative of the actual facts. There was a new demographic study conducted earlier this year that should be used to factor into any decision. However, my understanding is that it will not be ready prior to this vote.

Please go into this vote understanding the school district and parents strongly oppose the use of this space as residential. Which is why, over the past couple years, the City Council, Naperville Planning and Zoning Commission have opposed other developments in Naperville and Aurora that would also add additional burden into the schools.

Please make the right decision for teachers, children and our overall reputation that focuses on outstanding education.

Good afternoon -

As a parent of a 7th grade student at Hill Middle School and a senior at Metea Valley High School, I am writing to **strongly** oppose the 410 residential apartments that are part of the proposed CityGate West Development.

These high-density residential apartments will push my childrens schools over student capacity. This property should be developed for business, or rezoned and developed with age-restricting housing that would not generate students for District 204. As a resident of Riverbrook West, I have no doubt our neighborhood would be one of the first to be rezoned if this development is approved.

It is time to protect our schools and hold firm to **opposing** developments in Naperville that would add additional students to District 204.

Regards -

Kelly M. Hensley-Hill

To whom it may concern,

We are residents of Naperville and we own a home in west wind (book road and Rickert). Our three children attend may watts, Hill, and will attend metea. Our schools are at capacity and we do not want any new apartment developments feeding into our schools. Please block this.

Hello,

As a resident of Naperville, district 204, and brook dale elementary school, I am strongly opposed to the development of high density apartments that will put further strain on our school district and Elementary school. Brookdale is already at capacity and forced re-districting forcing children to go to further schools away just a couple years ago. This development with an addition of 140+ students will put strain on our schools and communities.

I urge you to vote NO to this development that will negatively effect our community.

Please vote no on building these apartments. 400 apartments will add potentially hundreds of children to Brookdale Elementary, Hill Junior High, and Matea High School. All three schools are already at capacity.

It is irresponsible to keep taking land meant for commercial development and rezoning it for residential development.

I get that the developers will get a large gain from the rezoning and building of the apartments. However, all of the other stakeholders, the school taxpayers and school children, will be harmed.

This area has been overrun with past rezonings and apartment approvals, primarily by city representatives that do not reside in this area and do not pay school taxes to District 204.

Being cynical, I wonder if a development of this size and type were proposed for district 203, with schools at capacity, would the representatives that live in the District 203 area vote for approval? I THINK NOT.

I am opposed to the building of residential housing (410 apartments), in the Northwest quadrant of Citygate west. The schools serviced by that area, Brookdale, Hill and Metea are already at capacity and should not be subjected to an unnecessary increase in students. As a 25 year resident of Brookdale, I would support commercial ventures or age restricted housing. If you as a council care about keeping our highly respected school districts excellent (which helps ALL of Naperville's residents, not just developers) you will vote no to residential use of the property.

Sincerely,

Julie M Ensinger, OD

Dear Planning and Zoning Committee,

I beg you to vote NO on the residential development at City Gate West. The plans calls for 410 apartments which will generate too many students for our schools. Brookdale Elementary, Hill Middle School and Metea Valley High School are already at capacity. This property should remain a commercial development and not be rezoned to allow residential.

Please protect our schools and residents.
Thank you.

Hello,

I am writing in opposition to the new housing development being voted about during the meeting on Aug. 19th. This development will directly impact the students at local schools, specifically Brookdale Elementary, Hill Middle School and Metea Valley High School. Currently, I have a child at both the elementary school and middle school. Both of these schools are over capacity with student enrollment. My 3rd grade son was in a class with 31 students last year. During math instruction, there were 37 students and the teacher had to use hall space for some of the students during this time. At the middle school, my daughter was in a math class that didn't have enough student desks because the class was over capacity.

The influx of students moving in is disconcerting. People move to D204 for the positive reputation of the schools. It is shocking when people are told about the classroom numbers. Teachers are not able to give the attention students deserve because of these outrageous numbers.

I implore you to reconsider more housing in this proposed area. Instead, business and/or industry should be considered as a means of revenue to help our schools.

Sincerely,
Kathy McCoy- Pepiot

Dear Council Members,

I am contacting you in regards to the City Gate West Development near me. This development will have a direct and negative impact on our already overcrowded schools of Brookdale Elementary, Hill Middle School and Metea Valley High School. The schools cannot support an additional 410 residential apartments within this commercial area.

The student generation tables used by the City of Naperville are 30 years old. Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential development. District 204 has been working with the City of Naperville to update the generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy, and won't happen before the approval of this residential development. District 204 has experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! (This would short the district \$1.35 million of what it requires to educate the students generated from this residential development.)

District 204 is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity.

I may support this property being developed for business, or rezoned and developed with age-restricting housing. Age-restricting housing would not generate students for District 204.

In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

Respectfully,
Karen C. Johnson

Hello,

I am opposed to the City Gate West development that is proposed for re zoning this week. I have lived in the Brookdale community for 28 years. I had two children attend Brookdale Elementary and Hill Middle Schools. They received a wonderful education there. The 410 apartments that are not for seniors or age restricted would have a severely negative impact on our schools. They would be over capacity. Naperville has always been a city that values the educational experiences of it's children. That is why we moved here and have supported the district with our ever increasing taxes. Please listen to the voices of the community and put a stop to a rezoning that would allow 410 new apartments and threaten that educational excellence.

Thank you for hearing my concerns and for your service to the city of Naperville.

It is much appreciated.

Sincerely,

Sue Sportiello

Hi,

Please DO NOT Vote for the CityGate West development!

We cannot have 410 residential apartments in a COMMERCIAL area attending schools that are already at full capacity. We have already had to move students out of our neighborhood and bus them to a school outside of walking distance. This is a case of a greedy developer that knows they can lease apartments in a highly desirable school district, which will negatively impact schools and would have a negative financial impact on residential property taxpayers and District 204.

The student generation tables used by the City of Naperville are 30 years old. Using the City's OUTDATED generation tables would result in District 204 losing TENS OF THOUSANDS OF DOLLARS for EACH student generated by this new residential development. District 204 has been working with the City of Naperville to update generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy and won't happen prior to the approval of this residential development. District 204 has experienced two to three times the number of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! This will short District 204 \$1.35 MILLION of what it requires to educate the students generated from this residential development.

District 204 is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity, AGAIN!

We can support this property being developed for business. We cannot enforce age restricted housing.

In the past year and a half, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission ALL OPPOSED developments in Naperville and Aurora that would add additional students to District 204. We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education and it is time for them to protect our highly sought after schools and residents!!

Best,

Jacqui Erwin

Good afternoon,

I wish to lodge my opposition to the CityGate West Development currently under consideration.

My concerns have been voiced by others and I wish to add my name to their call for a halt to further residential development until a more thorough review of Naperville's needs (Property tax & school support and adequate housing needs) are addressed.

We cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity. This is a case of a greedy developer that knows they can lease apartments in a highly desirable school district, which will negatively impact schools, and would have a negative financial impact on residential property taxpayers and District 204.

The student generation tables used by the City of Naperville are 30 years old. Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential development. District 204 has been working with the City of Naperville to update the generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy, and won't happen before the approval of this residential development. District 204 has experienced 2-3 times the numbers of students generated from medium

and high-density residential developments than the City of Naperville's student generation tables! (This would considerably short the district on what it requires to educate the students generated from this residential development.)

Our District is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity.

We can support this property being developed for business, or rezoned and developed with age-restricting housing. Age-restricting housing would not generate students for District 204.

In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

These talking points are concise and to the point. As a parent of Hill Middle School and Metea Valley students I am keenly aware of the spacing and resource issues. School resources are only as good as the management and oversight that maintains them.

Please take my concerns with you to the planning meeting and work with parents and city leaders to develop and grow our city with all citizens in mind.

Kind regards,

Orla Conlon

I am strongly opposed to the re-zoning of CityGate West for general residential development. The burden on our school systems, to say nothing about our property tax increases is not acceptable. Zone it for senior housing if re-zoning is being considered.

As a parent of three kids, one each in Metea High, Thayer J Hill MS, and Brookdale Elementary, I appreciate that the council, including our mayor, has previously always voted against further residential development in District 204.

With the Brookdale subdivision, where I live and provide voting representation, I ask that you continue in this mindset and vote against CityGate West development.

As you know already I'm sure, District 204 is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity. We struggle with class sizes now!!!

We can support this property being developed for business, or rezoned and developed with age-restricting housing. We are in need of more support from commercial zoning already and fight higher taxing because we have more homes already.

As you know I'm sure District 204 families constantly feel the competitive pull with District 203 who with more commercial property always seems to get more for their tax dollars from their programming. Naperville is an amazing place to live and my family is pleased to have you representing us in government. I trust that you will support, and continue to represent our side by voting against commercial development for this CityGate West consideration.

Thank you
Gina A Howley

Dear Planning Commission,

As District 204 parents with a student at Metea Valley High School, we are writing to let you know that we oppose the CityGate West development. Our schools are at or near capacity and cannot handle more students that would come from a 410-unit apartment complex. The hallways are extremely crowded during passing periods. Many classrooms are crammed with 35 desks and some students are sent to the hallway or LMC to work on a project.

The 100-acre site at Interstate 88 and Route 59 should remain commercial. Rezoning this property from commercial to residential would place a huge financial burden on District 204.

Please do not approve the rezoning of this property from commercial to residential.

Thank you for listening to the District 204 community.

Sincerely,

Cindy and Terry Brennan

I am opposed to this proposal as noted below:

1. **We cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity.** This is a case of a greedy developer that knows they can lease apartments in a highly desirable school district, which will negatively impact schools, and would have a negative financial impact on residential property taxpayers and District 204.
2. **The student generation tables used by the City of Naperville are 30 years old.** Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential development. District 204 has been working with the City of Naperville to update the generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy, and won't happen before the approval of this residential development. District 204 has experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! (This would considerably short the district on what it requires financially to educate the students generated from this residential development.)
3. **District is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity.**
4. **We can support this property being developed for business, or rezoned and developed with age-restricting housing.** Age-restricting housing would not generate students for District 204.
5. **In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204.** We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

Dear Naperville Planning & Council Members

I am writing to express my deep concern about CitiGate West development that is being voted on today (Wednesday). I am a District 204 parent and have been extremely frustrated by excess residential development that continues to occur in the north west part of our city. Right now, Brookdale, Hill and Metea are at capacity. Two years ago Brookdale became so overcrowded that they faced the possibility of creating new classrooms in corners of the gym. The district eventually adjusted school boundaries so now nearly 100 students who live less than a mile from Brookdale School are bused to other schools 3+ miles away. That is a sad situation and certainly does not fit with Naperville's reputation of being a great place to raise kids.

With this in mind, how can the city possibly add another residential property within those school boundaries? There is simply no room for children who may reside there, and District 204 has made it clear they can't afford to build or add an additions to schools. The result would be further overcrowding of our schools and reduced quality of education. Naperville has a reputation for great schools, but decisions like this will certainly tarnish that reputation.

I would also like to add that residential demographics have changed significantly in recent years and Naperville seems to be ignoring this. High density residential units are inhabited by far more families with children today than in years past. I believe this is what caused schools on the North side of Naperville to become overcrowded to begin with. Anyone who believes that this development won't have much impact on schools needs to visit an apartment complex in this area to see the large numbers of children who reside there.

I am asking you to vote NO to this development to protect our schools.

Thank you for time.

Sincerely,

Rebecca Yonan

Dear Planning and Zoning Commission,

If the current CityGate West project goes forward as planned it would be a huge detriment to IPSD 204. The schools directly affected on the north end of Naperville already exceed capacity. Recently, students that currently live in the Brookdale neighborhood were forced to be bussed to schools outside of the neighborhood due to overcrowding at Brookdale Elementary School and now you're considering approving a development that would exacerbate this problem. The current development is simply unacceptable.

It is well-known that the current attendance projection formulas aren't accurate predictors. The current Brookdale elementary school overcrowding situation is a clear example of faulty attendance projections. The current multi-family units far exceeded the projected student numbers and there is no reason to believe that this proposed development would be any different.

Although a commercial development seems to be a more appropriate land use, if this is definitely going to be a housing development, I strongly encourage you to put a no school-aged children restriction on this development. As stewards of our community, it is imperative that you not approve a development that would further exacerbate an already difficult educational situation. Not only would this impose an unnecessary burden on our schools, it would also be detrimental to our property values.

I implore you to deny this current development design.

Sincerely,
Lori Jackson
IPSD 204 and Brookdale resident.

To whom it may concern:

I am a resident in the Brookdale neighborhood in Naperville. I am writing to express my opposition to the newly proposed CityGate West development. My main concern is the development which includes new apartment buildings. I believe this will overload our existing schools which already operating at a high capacity. Unless there are plans to expand the schools, I believe this will negatively affect the education of our students.

Best regards,
Jason Kurien

I am in opposition of a residential apartment development that would impact a school that is already maxed out. As a taxpayer I do not see this as a positive change in our area. Our schools cannot take on any more. This will have a negative impact on the well established education system we have in 204. Age-restricted housing is an option for the area. We are proud of our educational status in Naperville let's maintain that standard.

To whom it may concern:

As a resident of Brookdale subdivision and District 204 I am highly concerned with the re-zoning of City Gate. We simply cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity! Brookdale Elementary, Hill Middle School, and Metea Valley High School will all be OVER capacity. This is not acceptable. The District strongly opposes this high-density development for a reason, so please listen to your School Board! We don't have the space, and we don't have the funding for all these new students.

We need the City to remain consistent in their decisions and commitments and continue to oppose developments that add additional students to District 204. Protect our schools and residents! We support this property being developed for business, or rezoned and developed with age-restricting housing that will not generate students for District 204.

Our property taxes are already high due to lack of commercial property. This will put even more strain on residents. District 204 is struggling to survive on a shoestring budget as it is, it cannot handle any more students due to developments like this. It's time to start using updated student generation tables as well, which may mean waiting on approval of this plan until they are finished. The City's use of 30-year old student generation tables will cost the district tens of thousands of dollars for each student generated by this new development. District 204 has experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's

student generation tables. This needs to stop so that our schools can thrive and maintain their standard of excellence.

I am hopeful that the City Council and Planning Committee will make the right decision for our students and residents in District 204.

Sincerely,
Amy Erickson

Please vote against the citygate residential zoning that would continue to overpopulate our schools.

1. **We cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity.** This is a case of a greedy developer that knows they can lease apartments in a highly desirable school district, which will negatively impact schools, and would have a negative financial impact on residential property taxpayers and District 204.
2. **The student generation tables used by the City of Naperville are 30 years old.** Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential development. District 204 has been working with the City of Naperville to update the generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy, and won't happen before the approval of this residential development. District 204 has experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! (This would considerably short the district on what it requires financially to educate the students generated from this residential development.)
3. **District is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity.**

4. **We can support this property being developed for business, or rezoned and developed with age-restricting housing.** Age-restricting housing would not generate students for District 204.
5. **In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204.** We need the City to remain consistent with their past decisions and commitments. I am writing in opposition to the request by City Gate West to rezone the property in question for mixed use residential. We cannot have 410 residential apartments, in a commercial area, with new students attending schools that are already at full student capacity.

Indian Prairie School District 204 is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity.

I am in support of this property being developed for business, or rezoned and developed with age-restricting housing. Age-restricting housing would not generate students for District 204.

In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

Thank you for your careful consideration of this rezoning request and please vote NO to rezoning for residential housing.

Hello

Thank you in advance for opening this email. I recently learned of the proposed City Gate planning and zoning changes. As a property owner and tax payer in District 204 plus a parent of 3 children in our max capacity schools, I am completely against adding additional residential properties. Unless they are age restricted, ie adult communities. Our children's classes are at max capacity as it is and this decision will directly effect their ability to have 1:1 time with the teachers thus declining their test scores. The resources available, class room space, etc, does not support this residential project.
Please take this in to consideration when deciding.

Thank you

Maribel Lopez

Hello,

I strongly oppose the development of any residential area that will add significant students to Brookdale, Hill, or Metea valley. We are already near or at capacity and if there is a complex that is built it will surely push us over capacity.

It is ridiculous to develop housing that could add a significant amount of students to an already over crowded district. This area can be used to develop businesses, or even potentially age restricted living accommodations, meaning no students would be added to the district, but to even consider adding an area that could potentially add hundreds more students is not responsible.

I will take any action needed to help prevent this from being approved and development from moving forward.

Thanks,

Jamie Garbis

Folks,

Please stop this realtor/builder // vested interest push for including additional 'apartment complexes' into our school districts!..

IT just serves the builders to charge more for their property while touting 'District 204 Schools' as a key selling point for their unsightly boxes of homes!!

We will hold a sit-in protest once the situation allows us..

Thanks and Regards,

DJ Singh / Windward CT Naperville IL

Brookdale Neighbors,

We need to make some noise! Another residential development (CityGate West) is going to be voted on by Naperville's Planning & Zoning Committee tomorrow night at 7:00pm that will directly impact student enrollment at **Brookdale Elementary, Hill Middle School and Metea Valley High School**. This development is getting pushed through at a blazing speed—so please act now.

Why This Matters

The development calls for 410 apartments, which will generate 140+ students for Brookdale Elementary, Hill Middle School and Metea Valley High School. These three schools are currently at full student capacity, and this development will push all three schools over student capacity.

The site is 100-acres at the northwest quadrant of the Interstate 88 and Route 59 intersection. The developers are trying to rezone this property from commercial development to mixed-use for residential, retail and hotel. One of the reasons our property taxes are so high is because Naperville (in District 204) does not have enough commercial property to offset our residential property taxes. This specific creation of more residential property raises our property taxes and places further financial burden on District 204 to do more with less revenue.

Your Action is Needed

Community members and especially parents who have students at Brookdale Elementary, Hill Middle School or Metea Valley High School need to email your opposition to the CityGate West Development by TOMORROW AFTERNOON (Wednesday, August 19) to planning@naperville.il.us and copy council@naperville.il.us.

Talking points:

1. **We cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity.** This is a case of a greedy developer that knows they can lease apartments in a highly desirable school district, which will negatively impact schools, and would have a negative financial impact on residential property taxpayers and District 204.
2. **The student generation tables used by the City of Naperville are 30 years old.** Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential development. District 204 has been working with the City of Naperville to update the generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy, and won't happen before the approval of this residential development. District 204 has

experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! (This would considerably short the district on what it requires financially to educate the students generated from this residential development.)

3. **District is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity.**
4. **We can support this property being developed for business, or rezoned and developed with age-restricting housing.** Age-restricting housing would not generate students for District 204.
5. **In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204.** We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

I am disappointed to see the proposal to rezone the Northwest corner of 88/Rte 59 from commercial to a mixed residential/commercial/hotel.

This development will bring in a disproportionate amount of students vs income to our schools, having a negative impact both financially and on the students of Brookdale Elementary, Hill Middle School, and Metea, all of which are operating at capacity already.

I have students at all three of these schools. Class sizes are large and students are already compromised: 30 students in a third grade class last year, History class was in the LMC at Hill because there wasn't a classroom available; hallways are crowded and the lunchroom packed at Metea. The decision to approve residential housing based on a student generation table that we know provides inaccurate data will compromise the education of the children in IPSD204 even more. This is a cash-strapped district that needs more commercial or age-restricted (elderly) housing, not housing that will add children to our already packed schools.

This is a bad decision for our city. I hope the right decision can be made. The decision that supports the education of our students and does not burden our system further.

Ann Cotner, parent of 4 kids in the district

Dear Naperville Planning and Zoning Committee,

We are writing to state our opposition to the rezoning of the development called CityGate West. We are especially opposed to zoning it for residential use. The creation of more residential property raises our property taxes and places further financial burden on District 204 to do more with less revenue. As retirees, we cannot afford to pay higher property taxes. By zoning the property for residential use, it will result in an influx of new students in the local schools. When our child was in Brookdale School, his class size was 30 kids. To add additional students to that class size is ridiculous. Students cannot get an appropriate education with such large class sizes. Please do NOT rezone this property for residential use.

Thank you,

Melissa and Denis Kania

I'm writing to voice my opposition to the residential units that are a part of the development plans for CityGate West.

We cannot build further residential properties that would feed into schools already at full capacity. Doing so stresses District 204 to do more with less, de-values the residential homes of these districts (mine included) because the schools will be overcrowded and suffer a loss of funding, and will have a negative financial impact on residential property tax payers and District 204. The student generation tables are 30 years old and have been shown previously to produce estimates that are way too low. We've learned our lesson. Please do not make the same mistake twice.

We need to do the right thing. Support District 204, maintain the standard of learning that District 204 has worked so hard to achieve. Naperville is known for being one of the best places in the entire country to raise a family. Why jeopardize that? We know better.

In my opinion, this land needs to be used in its entirety for commercial purposes, providing the much needed income for our community and schools. I'm putting my trust in you you to make the right decision for our schools and our community.

Sincerely,

Bonnie Clemens
District 204 Resident

Good evening,

My name is Christine Krueger, and I am a resident of the Brookdale Subdivision in Naperville.

My family strongly opposes the CityGate West Opposition.

Brookdale Elementary, Hill MS, and Metea HS are already overcrowded, and as a community, we cannot afford the negative tax implications.

High density residential apartments cannot be supported. Having the property zoned for business or age-restricted housing will not impact the school.

In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and reside

Thank you,
Christine Krueger

Hello!

I'm a Brookdale resident and parent of two district 204 students. Please oppose the new development at CityGate West. The 410 new residents would result in over 100 new students that the school system currently does not have room to educate. For two years the elementary had no music or art room. This cannot be acceptable in a school system with such a great reputation. There has got to be a better solution and I plead with you to try to find it as opposed to putting money in the developer's pockets.

Thank you for listening. I trust you to make the best decision for our community and our future.

Amy

Hello

Please stop the rezoning for apartments to be built at CityGate west. The schools (all) are at max capacity and this will raise our already high property taxes.

Hello,

We oppose the rezoning of CityGate West for residential development. District 204 schools can not handle the strain of students that this development will create. We can support business development and we can support age restricted residential development but our schools are already almost at capacity and this development will be asking us to do more with less. You have restricted residential development for district 203 and we ask that you use the same consideration for district 204.

Thank you,
Rachel Hensley

To whom it may concern,

It's just not a good idea! Please do not allow the City Gate West Development to include any residential housing! Brookdale, Metea, and Hill schools are already overcrowded and there is no room for new students. It is unacceptable that you are considering approving a new apartment development in an area that has no room for more children. If you approve this, you should build in the need for the developer to build a new school that will serve the children who live there. As you know, D-204 has received two to three times the number of students generated from Naperville's medium and high density developments than the City of Naperville's student generation tables. Look at Brookdale's boundaries. It is almost unbelievable that you would allow this change to happen. Please don't divide Naperville any more than it is. Stop just looking out for the District 20 kids! D-204 is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School significantly over student capacity. Please consider allowing this property to be developed for business, or rezoned and developed with age-restricting housing that would not affect the school system.. In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. What makes this one different? Who benefits from the residential piece of it?? Please do not let this happen.

Sincerely,
John Mann

Please do not allow the passage of the City Gate West Development. I live in North Naperville, and my kids go to Brookdale and Metea. These schools are already overcrowded and there is room for ZERO new students. I have a 4th grader who spent his entire last year being overlooked in a tiny classroom with 32 other students. There was one rotating seat, so that transient students could arrive, disrupt class, and leave. No fewer than 5 students transferred in and out of his class last year. He consistently has 31-32 kids in his classes.

It is unacceptable that you are considering approving a new apartment development in an area that has no room for more children. If you approve this, you should build in the need for the developer to build a new school that will serve the children who live there

As you know, D-204 has received two to three times the number of students generated from Naperville's medium and high density developments than the City of Naperville's student generation tables. Look at Brookdale's boundaries. It has become asinine.

Similarly, the district is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School significantly over student capacity.

Please consider allowing this property to be developed for business, or rezoned and developed with age-restricting housing that would not affect the school system..

In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. What makes this one different? Who benefits from the residential piece of it??

Please do not let this happen.

To whom this concerns,

I am writing in opposition to the new city gate west development. My children attend Brookdale elementary and will go through to Hill then to Metea. It's pretty absurd that we are even thinking about this project that will surely push capacity of these schools beyond maximum capacity.

I am fully in support of new businesses or age restricting housing that will not affect the current families of this community and school district.

I hope you vote against this proposal or make modifications to not overburden the current system in place

Thank you

If school capacity was not a concern, I would be supportive of this and most other developments in Naperville. But there is no way district 204 can accommodate this new development when Brookdale, Hill and Metea are at or close to capacity. I have kids at Brookdale and Hill, next year I'll have one at Metea and so I strongly oppose this development.

Brookdale had to move students to another school **outside of their own neighborhood** a couple years ago due to capacity issues. So until the district can figure out a solution for school capacity on the north side of Naperville, this and other new high density developments should be rejected.

We all know the new student estimates as a result of this and other developments are significantly underestimated, so please prevent this from moving forward.

Thanks,
Mike and Abby Penich

I am writing to express my concern and opposition to the City Gate West development that is being proposed for northwest Naperville. I have been a resident of this part of Naperville since 1991 and have watched this area grow rapidly. The schools became more and more crowded, and eventually the need for a third high school became apparent. After the contentious battle about where to build Metea Valley, and how to divide the students, I would not want to have to go through this again due to overcrowding at Brookdale Elementary, Hill Middle School, and Metea Valley. Adding 410 apartments to this area that already has a large number of apartment complexes would be detrimental to this area. I hope that the planning commission keeps the area zoned as it currently is - Commercial. This would help control school overcrowding, as well as giving Naperville a desirable tax base from the commercial development. If you choose to change the zoning to mixed-use residential, I would ask that you would require it to be age-restricted. Age restricted developments are in great demand, especially for seniors who choose to remain in Naperville, but do not want to have to deal with the upkeep of a house and yard. Please do not add another apartment complex to this apartment-heavy area of the city.

Dear Planning and Zoning committee,

Thank you for your work.

Please **do NOT proceed with the current plans for the CityGate West** residential development.

The **proposed CityGate West would detrimentally impact students and the quality of education in District 204.**

1. **Schools are already at full student capacity.**
 - a. Leased apartments in a highly desirable school district will negatively impact schools, **reducing funding per student** (already well below adjacent 203 and other comparable school districts).
 - b. District 204 has experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! (This would considerably short the district on what it requires financially to educate the students from this residential development.)
2. CityGate West would have **additional negative financial impact on District 204** and your constituents who are **residential property taxpayers**.
3. **A more informed decision can be made after student generation tables used by the City of Naperville are updated.**
 - a. **Current tables are 30 years old and are being updated.**

- b. Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential development.
 - c. District 204 has been working with the City of Naperville to update the generation tables.
 - d. A new demographic study was conducted earlier this year. As the process to update generation tables is lengthy, this information will not be available before the current decisions must be made regarding this residential development.
4. **District 204 is strongly opposed to these high-density residential apartments** that will put Brookdale Elementary, Hill Middle School and Metea Valley High School **over student capacity**.
 5. **We can support this property being developed for business, or rezoned and developed with age-restricting housing.**
 - a. Age-restricting housing would not generate students for District 204.
 6. **In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204.**
 - a. The City must remain consistent with their past decisions and commitments.
 7. Such "developments" will only be beneficial to all citizens when sufficient resources (buildings, teachers, funding, services) for District 204 are proportionally improved and increased.

Respectfully submitted,

Ben Bocher, Ph.D., P.E.
Environmental Engineering, Biotechnology & Bioenergy

Dear Planning and Zoning Commission,

I have owned my condo in the Brookdale neighborhood since 2003. My son was fortunate enough to attend Brookdale Elementary School before the IPSD 204 changed the boundaries within the neighborhood in an attempt to elevate the overburdened Brookdale Elementary School. Bridgewater's elementary school children are now bussed to Cowlshaw Elementary School which is more than 3 miles away. Furthermore, the condos just to the east of Tudor Dr have their elementary children bussed 3 miles away to May Watts Elementary School. Prior to the change in the school districts boundaries both condo developments had their children walk to Brookdale Elementary School which is less than 1.5 miles away. Having our elementary children walk to the elementary school that is located within the neighborhood where they live promotes family friendships and a strong cohesive neighborhood. With the proposed rezoning of the CityGate West Development to include an additional 410 residential apartments will place increased burdens on the already overburdened schools in North Naperville, specifically Brookdale Elementary School, Hill Middle School, and Metea Valley High School.

I urge you to vote no to the proposed rezoning of CityGate West development.

(1) We cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity. This is a case of a greedy developer that knows they can lease apartments in a highly desirable school district, which will negatively impact schools, and would have a negative financial impact on residential property taxpayers and District 204.

(2) The student generation tables used by the City of Naperville are 30 years old. Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential development. District 204 has been working with the City of Naperville to update the generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy, and won't happen before the approval of this residential development. District 204 has experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! (This would considerably short the district on what it requires to educate the students generated from this residential development.)

(3) District is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary School, Hill Middle School and Metea Valley High School over student capacity.

(4) We can support this property being developed for business, or rezoned and developed with age-restricting housing. Age-restricting housing would not generate students for District 204.

(5) In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

Thank you for your time,
Kristin Caffarelli

We oppose the Northwest corner of I88 & Rt. 59 rezoning from commercial to residential / apartments because:

(1) We cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity. This is a case of a greedy developer that knows they can lease apartments in a highly desirable school district, which will negatively impact schools, and would have a negative financial impact on residential property taxpayers and District 204.

(2) The student generation tables used by the City of Naperville are 30 years old. Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential development. District 204 has been working with the City of Naperville to update the generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy, and won't happen before the approval of this residential development. District 204 has experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! (This would considerably short the district on what it requires to educate the students generated from this residential development.)

(3) District is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity.

(4) We can support this property being developed for business, or rezoned and developed with age-restricting housing. Age-restricting housing would not generate students for District 204.

(5) In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

Thank you!

District 204 / Metea Valley (have student) / Aurora Homeowner
Marlo Cagle

Committee Members:

It has been brought to our attention that a residential development (CityGate West) is going to be voted on by Naperville's Planning & Zoning Committee on August 19th and that the decision to go forward with the project will directly impact student enrollment at Brookdale Elementary, Hill Middle School, and Metea Valley High School.

We are opposed to the CityGate West residential development project. The proposed project calls for 410 apartments which will generate an additional student load for school district 204's Brookdale Elementary, Hill Middle School, and Metea Valley High School which, as we understand, are schools operating at near or full capacity now.

As long-time residents of Brookdale, we have seen our real estate taxes continue to rise with the major portion of the taxes going to school district 204. Over the last four years, 77% of our real estate taxes have been allocated to district 204.

In our view, high density residential developments generate a major portion of the student population in school district 204. We question whether the real estate taxes generated by these high density residential developments are comparable to single-family homes on a pupil per capita. It certainly would be quite informative to see such a comparison.

Without even considering the CityGate West residential project, we believe that far too much of our real estate tax dollars are being allocated for education. The addition of the CityGate West residential project can only exacerbate capacity conditions at the schools and will most certainly cause our real estate taxes to continue its unconscionable upward trend.

Do not get us wrong. We unequivocally believe that education is a vital component to a successful, thriving society. But one has to ask - - how much resources are needed and at what cost do we as a community have to pay to get quality education. We have a novel proposal - - - that a study be conducted to thoroughly review district 204's budget and further to find ways to allocate more of our real estate taxes to our Naperville community which, we might add, will benefit more of all the residents of the city.

Our political leaders run on platforms pledging to freeze or control the growth of our real estate taxes. They have failed miserably to keep their pledge! Our real estate taxes continue to rise with the lion share allocated to school district 204.

In summary, there are two concerns. One is potential overcrowding at Brookdale schools and the other is continued unconscionable growth in real estate taxes to meet the financial demands of district 204. Both are real concerns that should be resolved before embarking on another high density residential project. The CityGate West residential project can only negatively add to these concerns!

We strongly request that you vote **no** on the CityGate West project!

Sincerely,

Bob & Marlene Matlosz

Our family greatly opposes the development of the CityGate West residential development. Brookdale, Hill, and Metea are already far too overcrowded. Another 150 students will not allow for the quality education that 204 prides itself on. We will not support this development and will take action the next time the City Council will be holding elections.

As a resident of Brookdale neighborhood, our family opposes the building of teh CityGate West community. Brookdale School, Hill Middle School, and Metea are already FAR TOO overcrowded. We do not need another 150+ students to contend with. Please do not move forward with the residential development that will already greatly impact the functioning of our schools.

Sincerely,
Kristin and Eric Scharping

Hello,

I am in opposition to this development. I have children attending Brookdale elementary and the school system is already over crowded. I don't think it is appropriate to continue adding more residential units to the area and more students to already over crowded schools.

Thank you.

I am a Brookdale resident opposed for a residential apartment building for this reason. Business is fine. 55+ is fine. Commercial is fine. But not what is proposed. Here's why.

1. **We cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity.** This is a case of a developer that knows they can lease apartments in a highly desirable school district, which will negatively impact schools, and would have a negative financial impact on residential property taxpayers and District 204.
2. **The student generation tables used by the City of Naperville are 30 years old.** Using the City's outdated generation tables would result in District 204 losing tens of thousands of dollars for each student generated by this new residential development. District 204 has been working with the City of Naperville to update the generation tables. A new demographic study was conducted earlier this year and the process to update generation tables is lengthy, and won't happen before the approval of this residential development. District 204 has experienced 2-3 times the numbers of students generated from medium and high-density residential developments than the City of Naperville's student generation tables! (This would considerably short the district on what it requires financially to educate the students generated from this residential development.)
3. **District is strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity.**
4. **We can support this property being developed for business, or rezoned and developed with age-restricting housing.** Age-restricting housing would not generate students for District 204.
5. **In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204.** We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

Hello,

I am reaching out to encourage you to oppose the development of new residential apartments on the CityGate property that would add students to district 204 schools.

I am a parent of students at Hill and Metea and I am concerned about these schools already being at or near capacity.

Please encourage development that would increase the tax revenue to our district without adding additional students.

Thank you for your service to our community and your consideration of this matter.

Sincerely,
Jennifer Gladden

Hello,

As a resident in IPSD District 204, I am writing you regarding the CityGate West residential development.

This proposed community of 410 apartments is a poor use of the land in this area. Residential use in this area is fraught with difficulties for both cars and pedestrians. Roads are already congested due to the proximity to Route 59, Warrenville Amazon warehouse, I-88 entrance and exits, etc. Sidewalks on neighboring roads (Diehl/Ferry/I-88 interchange/Route 59) are not safe for the residents to walk, run, bike on due to the high-speed limit and vehicle density on surrounding roads.

With continuing economic difficulties across the US, many families seek out apartments as their residence, particularly families with children. These 410 apartments are going to generate more children than your current estimates. Those children will need to attend local schools.

None of the close-proximity existing elementary (Brookdale or Longwood), middle (Hill) or high (Metea) schools are walkable. All of these schools are at full capacity, meaning they're already overcrowded and cannot accommodate more students. So these children will all need to be bused to other schools.

The only way I would approve CityGate West residential development is if the developers donated land for new schools and built a new school on the north side of Naperville or provided significant, on-going funding to assist with busing operations to get these children to schools that are not overcrowded.

I'm not ready to see District 204 struggle to accommodate students from the CityGate West residential development because of the hastily-made decisions that the City of Naperville is making that hurt our school district while only increasing the profits of developers. Please vote no against this rezoning and development.

Sincerely,

Amy Hausman

I would like to express my opposition to the planned RESIDENTIAL expansion at CityGate West. My family moved from Bartlett to Naperville just over a year ago in large part because of the high quality of the schools here and specifically chose our location (for which we paid a premium!) in order to have access to the specific schools in 204 that our children can now attend (Brookdale, Hill and Metea Valley). With a property tax bill of over \$10,000 annually and over \$7,700 of that going to the schools, we were willing to pay for quality.

What is being proposed now is adding an estimated 140+ students to these schools from 410 family units (apartments) that are clearly not going to be contributing to the school system at anywhere near the levels that homeowners are forced to contribute. The three schools impacted are already operating at or very close to full capacity and with the current epidemic we are looking for our children to have more space, not less. This is a case of a greedy developer that knows they can lease apartments in a highly desirable school district, which will negatively impact our schools, and would have a negative financial impact on residential property taxpayers and District 204. The property is zoned commercial, and commercial taxes are needed!!!!

I can fully support this property being developed for business, or rezoned and developed with age-restricting housing. Age-restricting housing would not generate students for District 204. In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204. We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

Thank you!

Sincerely,

Kopinski, Sara

Good afternoon,

I am writing to express my concerns about CityGate West Development. I have been a homeowner and resident of Naperville for over 4.5 years now and have a child who is starting to attend Brookdale Elementary and another in a few years.

Here is my opposition on this matter:

- **We cannot have 410 residential apartments in a commercial area attending schools that are already at full student capacity.** Talking to other people in the community, Brookdale Elementary already is at full capacity where some of the classes have to make adjustments. Adding more students to the school will only make matters worse.
- **The student generation tables used by the City of Naperville are 30 years old.** Old generation tables gravely estimate the expected students on the lower side. We will eventually have more students than what is projected now
- **District 204 is already strongly opposed to these high-density residential apartments that will surely put Brookdale Elementary, Hill Middle School and Metea Valley High School over student capacity**
- **We can support this property being developed for business, or rezoned and developed with age-restricting housing.** Age-restricting housing would not generate students for District 204
- **In the past 1.5 years, the Mayor of Naperville, City Council and Naperville Planning and Zoning Commission all opposed developments in Naperville and Aurora that would add additional students to District 204.** We need the City to remain consistent with their past decisions and commitments. The City speaks highly about education, and it's time for them to protect our schools and residents!

One of the main reasons for us to be a Naperville resident and homeowner is the best educational facilities that the city provides for our children. This development will compromise the high standards that the City has for education. I strongly request you to please oppose this development in its current form.

Thank you & Regards,
Madhuri Ramineni.
