PERIMETER PARKING LOT LANDSCAPING:
75th Street - 222'
229 divided by 4 (min. plant spacing) = 57.3 x 50 = 29 Shrubs
PLANTS REQ. PLANTS PROVIDED
29 30
Rickert Road - 120'
175 divided by 4 (min. plant spacing) = 43.8 x 50 = 22 Shrubs
PLANTS REQ. PLANTS PROVIDED
22 22

West Parking Screen - 46'
46 divided by 4 (min. plant spacing) = 11.5 x 5.0 = 6 Shrubs
PLANTS REQ. PLANTS PROVIDED
6 6

LANDSCAPE PLAN

SCALE 1" = 20'

GENERAL NOTES:

Plant material shall be nursery grown and be either balled and bur-lapped or container grown. Sizes and spreads on plant list represent minimum requirements.

The requirements for measurement, branching and ball size shall conform to the latest addition of ANSI Z60.1, AMERICAN STANDARD OF NURSERY STOCK by the American Nursery & Landscape Association.

Any materials with damaged or crooked/disfigured leaders, bark abrasion, unsound, insect damage, etc. are not acceptable and will be rejected. Trees with multiple leaders will be rejected unless called for in the plant list as multi-stem or clumpy (C).

If any mistakes, omissions, or discrepancies are found to exist with the work product, the Landscape Architect shall be promptly notified so that they have the opportunity to take any steps necessary to resolve the issue. Failure to promptly notify the Landscape Architect and the Owner of such conditions shall constitute their sole responsibility for the consequences of such failure.

Quantity lists are supplied as a convenience. However, Bidders and the Installing Contractor should verify all quantities. The drawings shall take precedence over the lists. Any discrepancies shall be reported to the Landscape Architect.

Actions taken without the knowledge and consent of the Owner and the Landscape Architect or in contradiction to the Owner and the Landscape Architect's work product or recommendations, shall become the responsibility (not of the Owner and the Landscape Architect, but for the parties responsible for the taking of such action).

Civil Engineering or Architectural base information has been provided by others. The location of various site improvements on this set of drawings is only illustrative and should not be relied upon for construction purposes.

Refer to Civil Engineering documents for detailed information regarding site, location, depth and type of utilities, and also locations of other site improvements, other than landscape improvements.

Plant symbols illustrated on this plan are a graphic representation of proposed plant material types and are intended to provide for visual clarity. However, the symbols do not necessarily represent actual plant spread at the time of installation.

All plant species specified are subject to availability. Material shortages in the landscape industry may require substitutions. All substitutions must be approved by the Village, Landscape Architect and Owner.

Comments shall verify location of all underground utilities prior to digging. For location outside the City of Chicago call "U.U.L.E." (Joint Utility Location for Excavators) 1-800-852-0123.

All perennial, ornamental grass, groundcover and annual beds shall be top dressed with a minimum of three inches (3") of mushroom compost. The top dressing shall be worked into the soil to a minimum depth of nine inches (9") by the use of a cultivating mechanism. Upon completion perennials & ornamental grasses shall be mulched with an additional two inch (2") layer of shredded wood mulch; Annuals & groundcovers shall be covered with an additional two inch (2") layer of mushroom compost.

All other planting beds and tree saucers shall be mulched with a minimum of three inches (3") of shredded wood mulch.

Planting beds adjacent to building shall be mulched in their entirety by the building foundation. Plant materials shall not be installed under building overhangs and other such areas which do not receive natural light.

All bed lines and tree saucers shall require a hand spaced edge between lawn and mulched areas.

Grading shall provide slopes which are smooth and continuous. Positive drainage shall be provided in all areas.

Soil shall be mineral base only.

Seed mixes shall be applied mechanically so that the seed is incorporated into the top one-half inch (1/2") of the seed bed. The seed shall then be covered with the specified blanket (installed per manufacturer's, specs or Hydro-Mulch).

All plant material shall be guaranteed for one (1) year from the date of acceptance.

UTILITY NOTE:

TREES SHALL BE INSTALLED A MINIMUM OF FIVE (5) FEET HORIZONTALLY FROM UNDERGROUND ELECTRICAL FEEDERS, SANITARY SEWERS, SANITARY SERVICES, WATER MAINS AND WATER SERVICES. TREES SHALL BE INSTALLED A MINIMUM OF TEN (10) FEET HORIZONTALLY FROM UTILITY STRUCTURES AND APPURTENANCES, INCLUDING, BUT NOT LIMITED TO, MANHOLES, VALVE VAULTS, VALVE BENCHES AND FIRE HYDRANTS. NO TREE, SHRUB OR OBSTACLE WILL BE ALLOWED 10' IN FRONT OF, 5' FEET ON THE SIDE AND 7' TO THE REAR OF ELECTRICAL TRANSFORMERS.

ALL EXISTING LANDSCAPING NOTED FOR PRESERVATION, SHALL BE PROTECTED DURING CONSTRUCTION VIA PLASTIC SAFETY FENCING. FENCING SHALL BE 4' HIGH AND ATTACHED TO STEEL DRIVEN POSTS SET NO FARTHER THAN 8\"/>

CONSTRUCTION FENCING SHALL BE ERECTED PRIOR TO ANY GRADING OR CONSTRUCTION ACTIVITIES-PREVENTING COMPACTION OF FOOT SYSTEMS OF EXISTING TREES AND SHRUBS. THE FENCING SHALL ENCLOSE THE AREA BENEATH THE DRIP LINE OF THE TREE CANOPY AND SHALL REMAIN IN PLACE UNTIL ALL CONSTRUCTION IS COMPLETED. NO PARKING, MATERIAL STORAGE OR CONSTRUCTION ACTIVITIES SHALL BE PERMITTED WITHIN THE FENCED AREA.
