Dear Cesar:

This letter is to confirm that on Saturday July 10th, 2020 you will put on the fireworks show over Fawn Lake and that it is approved by the White Eagle Golf Club. White Eagle Golf Club will require a copy of the insurance policy with White Eagle Golf Club named as an additional insured. The Club will also require that all city permits, and requirements are met before the show date so please secure those as needed prior to the show. Thank you.

Sincerely,

A handwritten signature in blue ink, appearing to read "Curtis Malm", written in a cursive style.

Operation of the Display.

1. The operator shall provide fire protection at the site as required by the fire chief or his/her designee.
2. Only permitted fireworks are authorized for use.
3. Fireworks display shall be 100% electrically fired
4. If, in the opinion of the fire chief or his/her authorized representative, lack of crowd control should pose a danger, the display shall be immediately discontinued until such time as the situation is corrected.
5. If at any time high winds or unusually wet weather prevail such that, in the opinion of the fire chief, his/her authorized representative or the display operator, a definite danger exists, the public display shall be postponed until weather conditions improve to permit safe discharge of fireworks.
6. Light snow or mist need not cause cancellation of the display; however, all materials used in the display shall be protected from the weather until immediately prior to use.
7. Display operators and assistants shall use only flashlights or approved electric lighting for artificial illumination.
8. No smoking or open flames shall be allowed within 50 feet of the firing or storage area as long as shells are present. Signs to this effect shall be conspicuously posted.
9. The first shell fired shall be carefully observed to determine that its trajectory will carry it into the intended firing range and that the shell functions over, and any debris falls into, the planned landing area.
10. The mortars shall be re-angled or reset if necessary at any time during the display.
11. When a shell fails to ignite in the mortar, the mortar shall not be touched for a minimum of five minutes. After five minutes it shall be carefully flooded with water. Immediately following the display, the mortar shall be emptied into a bucket of water. The supplier shall be contacted as soon as possible for proper disposal instructions.
12. Operators shall not attempt to repair a damaged shell nor shall they attempt to dismantle a dry shell. In all such cases, the supplier shall be contacted as soon as possible for proper disposal instructions.
13. Operators shall not dry a wet shell, lance, or pot for reuse.
14. The vendor and the sponsor shall provide perimeter control that will keep pedestrians out of the fallout zone. The entire firing range shall be inspected 15min following the display to locate any defective shells. Any such shells found shall be immediately doused with water before handling. The shells shall be placed in a bucket of water. The supplier shall then be contacted as soon as possible for proper disposal instructions.
15. When fireworks are displayed in darkness the sponsor shall ensure that the firing range is inspected early the following morning.
16. Any fireworks remaining unfired after the display shall be immediately disposed of or removed from the city/village and returned to the supplier from which they were purchased or to a location approved by the police chief or his/her designee.
17. The debris from discharged fireworks shall be properly disposed of.
