

Petition to the Honorable Mayor Chirico and the Naperville City Council

We, the residents of the Clow Creek Farm Subdivision; many of whom reside on Haider Avenue or Schillinger Drive, located within the Clow Creek Farm Subdivision and neighboring the new development proposed by Oak Hill Builders at Book Road and 103rd Street in Naperville, have put forth on this petition our signatures for the verification of the following.

The developers, Nick Stanitz and Oak Hill Builders, have worked with us and our association board to get our input and opinions for their proposed development. We believe that Oak Hill Builders will be the best choice to develop the property and would welcome their development into the Clow Creek Farm Subdivision.

When Clow Creek Farm was originally annexed, the entire development was granted a variance to allow 8' side yards on lots within the development. We would appreciate your consideration in granting the proposed addition to Clow Creek Farm Subdivision the same 8' side yard variance.

Thank you for your consideration to the foregoing.
