

The students of Naperville Central and Naperville North High School's Architectural Drafting and Pre-Engineering Drafting classes have been working this semester on the Naper Settlement Museum Design Project. This project is part of a competition in which our students and students from both High Schools presented their concepts, designs, and models to the City on April 25<sup>th</sup>. This once in a lifetime authentic learning project has been a wonderful and unmatched learning experience for our students. Teams set up their displays in the Gallery Walk after which each group had 8 minutes to give their presentation to the judges. After the presentation the judges and the public walked through the gallery of displays. The judges picked winners in four different categories.

Naperville Central Teacher: Brian Dunn

Naperville North Teacher: Rebecca DoOrio
