

# CITY COUNCIL AGENDA ITEM

**<u>SUBJECT</u>:** Recommend Award of the Second Two Year Renewal Option to Contract 11-082, Job Order Contract

**<u>TYPE OF VOTE</u>**: Simple Majority

# **ACTION REQUESTED:**

Approve the Award of the second Two Year Renewal Option to Contract 11-082, Job Order Contract, to F.H. Paschen in an amount not to exceed \$2,000,000.

# **BOARD/COMMISSION REVIEW:**

# **COUNCIL ACTION PREVIOUSLY TAKEN:**

Date	Item No.	Action
5/7/2013	K1	Award of First Extension
6/7/2011	J1	Original Award

**<u>DEPARTMENT</u>**: Finance – Procurement Services

**<u>SUBMITTED BY</u>**: Rachel Mayer, Finance Director Kim Schmidt, Purchasing Manager

# FISCAL IMPACT:

Funding will come from various accounts already budgeted for construction work; no additional expenditures or budget increases are proposed. This contract provides no minimum amount of work that the city must use the contractor for and is for an amount not to exceed \$2,000,000.

The City receives 1% of all cooperative contract work, or \$138,000 over the last four years.

# **BACKGROUND**:

Job Order Contracting ("JOC") provides an alternative vehicle for the procurement and award of construction service contracts and work. JOC has proven to be a low cost, efficient and effective solution for multiple trade projects. Proposals are requested for specific projects and the JOC

11-082, Job Order Contract Ext June 2, 2015 Page 2 of 3

contractor proposes based on the fixed prices stated in the contract. If the proposed quantities and pricing are acceptable to both the using Department and the Chief Procurement Officer, the work is ordered and the normal procedures for approval are followed. Additional projects will only be considered if performance is acceptable on each previous project, thus the contractor must be successful with each project to earn the right to be considered for new projects.

This program is designed to be used as a cooperative purchase agreement between the City, Naperville Community Unit School District 203, Indian Prairie School District 204 and the Naperville Park District as well as other agencies located within the Six County Area and the State of Illinois.

There is no ongoing minimum spend requirement as part of this program. However, as the administrator of the cooperative program the City receives 1% of the cooperative contract work, to offset the administrative costs of the program, approximately \$138,000 has been received to date. The contract includes a requirement that the JOC contractor work to maximize the use of local sub-contractors in performing work for Naperville. Other jurisdictions are allowed to ask that work performed for them include their local contractors.

On June 7, 2011 City Council awarded the initial contract through a competitive bidding process for an amount not to exceed \$2,000,000. The initial term of the contract was June 8, 2011 thru June 7, 2013 with the first contract options of 24 months expiring June 8, 2015. The term for this extension will be June 9, 2015 thru June 8, 2017 with no additional extensions available.

# **DISCUSSION**:

The JOC program has saved the City and neighboring community's significant time and money during its initial four years. The time required to get projects started has been reduced from 60-90 days to approximately 21 days. During the first two year extension, the City of Naperville has completed 53 projects for a total amount of \$991,910 in projects (see Attachment 2: Naperville Projects and Sub-Contractor List). Twenty two (22) other jurisdictions, taking advantage of the cooperative program, have completed 185 projects valued at an additional \$7.7 million. Attachment 3: Cooperative Projects and Sub-Contractor List has data related to these projects; this information is provided by the individual users of the program. Please note, the detailed data from May 2013 to May 2014 for the "Duties" section is incomplete due to the information not being captured from the individual projects during that time period. Moving forward, City staff will ensure this information is captured in total for reporting and analytic purposes.

In support of this cooperative, the City made presentations to and was recognized by both the Illinois City Manager's Association and Illinois Parks and Recreation Association for our progressive support of cooperative purchasing solutions.

# **<u>RECOMMENDATION</u>**:

Approve the Award of the second Two Year Renewal Option to Contract 11-082, Job Order Contract, to F.H. Paschen in an amount not to exceed \$2,000,000.

# CITY COUNCIL AGENDA ITEM

**<u>SUBJECT</u>:** Recommend Award of the First Two Year Renewal Option to Contract 11-082, Job Order Contract

**TYPE OF VOTE:** Simple Majority

# **ACTION REQUESTED:**

Approve the Award of the first Two Year Renewal Option to Contract 11-082, Job Order Contract, to F.H. Paschen in an amount not to exceed \$2,000,000.

# **BOARD/COMMISSION REVIEW:**

# **COUNCIL ACTION PREVIOUSLY TAKEN:**

Date	Item No.	Action
6/7/2011	J1	Original Award

**DEPARTMENT:** Procurement Services Team

# **<u>SUBMITTED BY</u>**: Michael Bevis, Chief Procurement Officer

# **FISCAL IMPACT:**

Funding will come from various accounts already budgeted for construction work; no additional expenditures or budget increases are proposed. This contract provides no minimum amount of work that the city must use the contractor for and is for an amount not to exceed \$2,000,000.

The City receives 1% of all cooperative contract work, or \$50,059 over the last two years.

# **BACKGROUND**:

Job Order Contracting ("JOC") provides an alternative vehicle for the procurement and award of construction service contracts and work. JOC has proven to be a low cost, efficient and effective solution for multiple trade projects. On June 7, 2011 City Council awarded the initial contract for an amount not to exceed \$2,000,000. The initial term of the contract was June 8, 2011 thru June 7, 2013 with two additional contract options of 24 months.

11-082, Job Order Contract Ext May 7, 2013 Page 2 of 3

# **DISCUSSION**:

The JOC program has saved the City and neighboring communities significant time and money during its initial two years. To date the City of Naperville has completed 16 projects for a total amount of \$1,574,350 in projects (see Attachment 2: Naperville Project and Sub-Contractor List). Fifteen (15) other jurisdictions, taking advantage of the cooperative program, have completed 56 projects valued at an additional five million dollars (\$5,059,528). The time required to get projects started has been reduced from 60-90 days to approximately 21 days. Additionally, while it is hard to quantify cost savings because there is significant savings related to bid preparation and there are usually no direct comparisons of bid and JOC prices, occasionally we have circumstances where a direct comparison is possible. One recent of example in cost savings is the Riverwalk Visitor Center roof project which was originally bid with the low of 6 bidders at \$80,821. The project was moved to the JOC contract and the final price is \$47,863 with a local Naperville sub-contractor performing \$38,200 of the work; the JOC program delivered the project at 41% savings with a local sub-contractor receiving a significant portion of the work.

It is our intention to continue to use the JOC program when advantageous to the City. There is no ongoing minimum amount the City must spend pursuant to this contract. We will seek proposals for specific projects that meet the criteria for consideration as a JOC project. Once identified, projects will be priced using the fixed prices in the contract. If the quantities and pricing is acceptable and approved by both the using Department and the Chief Procurement Officer, the work is ordered. Projects that exceed \$25,000 are submitted to the City Manager for approval and those exceeding \$100,000 are submitted to the City Council for approval. Additional projects will only be considered if performance is acceptable on each previous project, thus the contractor must be successful with each project to earn the right to be considered for new projects.

This Contract is designed to be used as a cooperative purchase agreement between the City, Naperville Community Unit School District 203, Indian Prairie School District 204 and the Naperville Park District as well as other agencies located within the Six County Area and State of Illinois. To date \$5,059,528 of work has been completed by other jurisdictions pursuant to our cooperative purchasing agreement (see Attachment 3: Cooperative Project and Sub-Contractor List). In support of this cooperative, the City has made presentations to and been recognized by both the Illinois City Manager's Association and Illinois Parks and Recreation Association for our progressive support of cooperative purchasing solutions. As part of the cooperative program the City has received 1% of this cooperative contract work, \$50,059, as reimbursement for administrative costs for these projects, this reimbursement is used to offset actual administrative costs of the program.

Through effective management of the sub-contractor process and intentional outreach to Local Businesses<sup>i</sup> as sub-contractors the JOC program has brought over \$1,187,964 in work to local businesses. The contract includes a requirement that the JOC contractor work to maximize the use of local sub-contractors in performing work for Naperville. Other jurisdictions are allowed to ask that work performed for them include their local contractors. The result to date is that

11-082, Job Order Contract Ext May 7, 2013 Page 3 of 3

local Naperville businesses have received \$473,411 of the work for Naperville; 30% of the total work and 39% of all subcontracted work. In addition, local Naperville businesses have received an additional \$714,553 from non-Naperville cooperative projects; 14% of the total work and 22% of all subcontracted work: The total value of work performed by local Naperville subcontractors to date is \$1,187,964.

#### **<u>RECOMMENDATION</u>**:

Approve the Award of the first Two Year Renewal Option to Contract 11-082, Job Order Contract, to F.H. Paschen in an amount not to exceed \$2,000,000.

# **BOARD/COMMISSION REVIEW:**

# **COUNCIL ACTION PREVIOUSLY TAKEN:**

Date	Item No.	Action		
4/19/2011	K1	Tabled		

**<u>DEPARTMENT</u>**: Procurement Services Team

**<u>SUBMITTED BY</u>**: Michael Bevis, Chief Procurement Officer

# FISCAL IMPACT:

Funding will come from various accounts already budgeted for construction work; no additional expenditures or budget increases are proposed. This contract provides no minimum amount of work that the city must use the contractor for and is for an amount not to exceed \$2,000,000.

# **BACKGROUND**:

Job Order Contracting ("JOC") will provide an alternative vehicle for the procurement and award of construction services contracts and work. JOC provides a low cost, efficient and effective solution for multiple trade projects. It is not meant to replace any of the City's procurement methods. It will supplement the City's current ability to deliver needed projects by offering another procurement tool from which the City can choose to accomplish the work.

JOC is a fixed price, competitively procured, performance based procurement. The Scope of Work for the JOC Contract is defined individual tasks in the Construction Task Catalog® (CTC). The CTC is a compilation of pre-priced work tasks for the installation and demolition of various

#### Page 154 - Agenda Item K.1. Page: 600 - Agenda Item: J.1.

11-082, Job Order Contract June 7, 2011 Page 2 of 3

construction related work tasks. Examples of CTC tasks include hanging drywall, painting, installation of carpet, conduit, and ductwork. All tasks have a fixed pre-set price for the installation of that task, and wherever applicable, the demolition of the same task. The CTC includes all CSI divisions of work and is customized for the City's work standards.

JOC has been used by the Federal Government since its inception in 1985. Nearly every military base across the nation has a JOC type procurement system in place. In the 1990's, JOC expanded to the non-federal sector and is currently being used by cities, counties, states, school systems, universities, housing authorities, park districts, water reclamation districts and transportation authorities, including aviation, transportation (DOT) and public transit systems. In 2005, the National Institute of Governmental Purchasing (NIGP) awarded the City of Miami Beach the prestigious "Best of the Best" Award for their implementation of a JOC procurement system and the subsequent results that significantly streamlined their procurement for construction related services.

This contract was considered at the April 19, 2011 City Council meeting. The City Council tabled the item in order to gain a better understanding of JOC before making a decision. Since that time, staff provided 6 memorandums to City Council describing in more detail JOC and the benefit it brings to the organizations that use it.

# **DISCUSSION:**

<b>NOTIFICATION</b>		RESP	ONSE
---------------------	--	------	------

Notices Sent:	693
Planholders:	67
Bids Received:	10

Proposals were received from the following firms: 

Leopardo Companies	F.H. Paschen
Western Contracting Group	Paul Borg Construction
KR Miller Contractors	Kellogg, Brown & Root (KBR)
McDonagh Demolition	AGAE Contractors
The Brockman Group	Chicago Commercial Contractors

An evaluation team consisting of staff from TED, DPU-W, Public Works, DPU-E and Procurement reviewed and scored all proposals based on the following criteria/weights published in the RFP:

Company Profile	18 Points
Comparable Project Experience	24 Points
JOC Knowledge/Experience	20 Points
Proposed Key Personnel JOC	20 Points
Experience	
Local Business Utilization Plan	18 Points

11-082, Job Order Contract June 7, 2011 Page 3 of 3

A shortlist of three firms was established and references were checked for the shortlisted firms. Reference scores were added to the original scoring and Cost Proposals were opened.

FIRM	SCORE	COST	ADJ COST
FH Paschen	75.4	\$998,000	\$1,323,607
Paul Borg	70.8	\$984,000	\$1,389,830
KR Miller	64.8	\$1,144,500	\$1,766,203

Final scores, Cost Proposals and Adjusted Costs are below:

While Paul Borg's cost was lower, their score was considerably lower in three main categories: Local Business Utilization Plan, Comparable Project Experience, and Company Profile (including references). Thus their Adjusted Cost was higher.

There is no minimum amount the City must spend pursuant to this contract. We will seek proposals for specific projects that meet the criteria for consideration as a JOC project. Once identified, projects will be priced using the fixed prices in the CTC, if the quantities and pricing is acceptable and approved by both the using Department and the Chief Procurement Officer, the work is ordered. Additional projects will only be considered if performance is acceptable on each previous project, thus the contractor must be successful with each project to earn the right to be considered for new projects.

This Contract is designed to be used as a joint purchase agreement between the City, Naperville Community Unit School District 203, Indian Prairie School District 204 and the Naperville Park District as well as other agencies located within the Six County Area and State of Illinois.

The City intends to use this contract, when appropriate (multi-discipline work) for work under \$100,000. When this contract is utilized for a project, it will allow staff to get work initiated in approximately 30 days rather than the traditional bid to work time of 3 months.

The term of the contract is for two years with three additional contract options of 24 months.

# **RECOMMENDATION:**

Approve the award of RFP 11-082, Job Order Contract, to F.H. Paschen for a two year term.

# CITY OF NAPERVILLE MEMORANDUM

Douglas A. Krieger, City Manager From January 21, 2011

# ATTACHMENT 1

# **PREVIOUS PAPERWORK**

**DATE:** January 21, 2011

TO:

FROM: Michael E. Bevis, Chief Procurement Officer

SUBJECT: Job Order Contracting Status Report

# **ACTION REQUESTED:**

This memorandum updates the Procurement Services Team's efforts to implement a cooperative Job Order Contract (JOC).

#### **BACKGROUND**:

JOC will provide an alternative vehicle for the procurement and award of construction services contracts and work. Under this delivery method, as individual projects are identified, the City will continue to select the procurement tool that best fits the situation. JOC is not meant to replace any of the City's procurement methods, but rather to supplement the City's current system by offering another procurement tool from which the City can choose to accomplish the work.

By definition, JOC is a fixed price, competitively bid, performance based procurement. At the time of bidding, the City does not identify any specific project or location of projects. The Scope of Work for the JOC Contract is defined individual tasks in the Construction Task Catalog® (CTC). The CTC is a compilation of pre-priced work tasks for the installation and demolition of various construction related work tasks. Examples of CTC tasks include hanging drywall, painting, installation of carpet, conduit, and ductwork. All tasks have a fixed pre-set price for the installation of that task, and wherever applicable, the demolition of the same task. The CTC can include all CSI divisions of work and will be customized for the City's work standards. Examples of the City's customization can include the development of City specific light fixtures, drinking fountains, concrete and asphalt mixtures, park benches, and specialty flooring.

JOC has been used by the Federal Government since its inception in 1985. Nearly every military base across the nation has a JOC type procurement system in place. In the 1990's, JOC expanded to the non-federal sector and is currently being used by cities, counties, states, school systems, universities, housing authorities, park districts, water reclamation districts and transportation authorities, including aviation, transportation (DOT) and public transit systems. In 2005, the National Institute of Governmental Purchasing (NIGP) awarded the City of Miami Beach the prestigious "Best of the Best" Award for their implementation of a JOC procurement system and the subsequent results that significantly streamlined their procurement for construction related services.

JOC Status Report January 20, 2011 Page 2 of 3

#### **DISCUSSION**:

#### System Progress

We have completed the first step, the development of the Construction Task Catalog (CTC) and supporting documents for both the solicitation and administration of the program. The CTC establishes unit prices for over 30,000 construction tasks.

On January 13, 2011 we held an informational session that was marketed to local vendors through postcard mailings and press releases. The session was well attended with 35 companies represented. The market is anxious to compete for a JOC contract.

The next step is the competition for the contract, we plan to issue the Request for Proposals the week of February 7, 2011. Competitors will be required to bid an adjustment factor to be applied to the prices in the CTC. The adjustment factor is basically a coefficient that is applied to the prices in the CTC such as 0.95, 1.05 or 1.10 and is meant to cover the Bidder's direct cost for performing the work as well as the Bidder's overhead and profit. The best value, and recommended award, will be determined by calculating the lowest adjusted cost. Costs for this calculation will be based on the Adjustment Factor. Once the contract is awarded, the City and other participants in the cooperative can order work from the CTC, receiving the best value for that task.

After a JOC contract is awarded, the City has an on call contractor, under contract, ready to perform work immediately. The City could potentially issue a series of individual projects to the JOC Contractor. When the City assigns an individual JOC project, it is the JOC Contractor's responsibility to identify all the tasks from the CTC required to complete the project (doors, drywall, paint, conduit, j-boxes, lights, etc...). The final price the City will pay for an individual task is equal to the price in the CTC times the Adjustment Factor. If the Contractor does a good job during both the Proposal phase of the project and during the construction phase, the contractor would be considered a Performing Contractor, and the City may continue assigning that contractor individual projects up to the potential maximum allowed during each term of the contract.

# Why Add JOC to the City's Tool Bag

The value of Job Order Contracting, when implemented and utilized appropriately, takes many forms. Those created by the nature of the process and the simple application of the tool:

- Proven Process
- Time Savings (30 to 90 days on work >\$25,000)
- Cost Savings (up to 26%)
- Fewer Change Orders and Claims
- Simplified Procurement Process

And, those that can be added to our specific application of the process:

- Improved Environmental Responsiveness
- Increased Local Business Participation
- Increased Inter-governmental Cooperation

# Page: 604 - Agenda Item: J.1. Page 158 - Agenda Item K.1.

JOC Status Report January 20, 2011 Page 3 of 3

Potential Cost Recovery through Cooperative Applications

#### **The Cooperative Possibilities**

Staff has met with representatives of the Naperville Park District, and School Districts 203 and 204, all expressed interest in pursuing the opportunities presented by a Cooperative JOC. We will continue to pursue the implementation of a JOC for ourselves, other co-terminus entities, and for that matter, any units of local government within the State of Illinois.

#### Next Steps

The Procurement Services Team proposes the following next steps:

- 1. Letting the JOC contract bid with accompanying public and industry information sessions. (February 2011 March 2011)
- 2. Award of contract. (April 2011)
- 3. Initiation of work and distribution of information to coterminous jurisdictions. (May 2011)

#### **RECOMMENDATION:**

That this memorandum be included in the Manager's Memorandum to inform the City Council about the project, next steps and the initiation of a cooperative Job Order Contract.

# CITY OF NAPERVILLE MEMORANDUM

**ATTACHMENT 1** 

**PREVIOUS PAPERWORK** 

# **DATE:** May 27, 2011

# **DATE:** May 27, 2011

TO: Douglas A. Krieger, City Manager FROM MAY 27, 2011

**FROM:** Michael E. Bevis, Chief Procurement Officer

SUBJECT: Job Order Contracting Consolidated Briefing Memoranda

# ACTION REQUESTED:

This memorandum is a consolidated briefing memoranda intended to answer City Council questions and provide a comprehensive understanding of Job Order Contracting (JOC) and the recommended award of RFP 11-082.

# **BACKGROUND**:

On April 19, 2011, on the regular City Council agenda, staff recommended the award of RFP 11-082, the JOC contract. Council tabled the matter and requested a better understanding of the program and the award. This consolidated memoranda combines the information provided in the six weekly briefings distributed to the City Council through the manager's memorandum.

As always, staff is available to meet with individuals to provide any additional information.

# **DISCUSSION**:

# JOC is an indefinite quantity, performance based construction contract.

JOC is an indefinite quantity, performance based construction contract that includes fixed prices and performance standards (i.e. specifications) for defined units of work. It does not, however, include either specific projects or project locations; additionally, there is no minimum purchase requirement. The award of the JOC provides the City with a tool that will provide an optional method to procure and deliver construction services to meet community needs. As individual projects are identified, the City will retain the ability to choose the procurement tool that best fits the situation. JOC is not meant to replace any of the City's procurement and delivery methods, but rather to supplement the City's current systems by offering another procurement tool from which the City can choose to accomplish the work.

JOC is a single contract awarded to a single company. The Recommendation for award is to FH Paschen Company. If awarded they will become the City's JOC contractor and be obligated by the contract to perform any work assigned by the City at the firm fixed prices in the contract. While the Contractor will be obligated to perform any work assigned; the City has no obligation to assign work.

# Page: 606 - Agenda Item: J.1. Page 160 - Agenda Item K.1.

Job Order Contracting Consolidated Briefing Memoranda May 27, 2011 Page **2** of **7** 

#### • How Does JOC Work?

JOC includes, as part of the contract, a Construction Task Catalog ("CTC") which is a pre-priced catalog of construction items. The prices are based on specific units of measure appropriate for the tasks (e.g. square feet, cubic yards, linear feet, etc. . .). Once the JOC contract is awarded the City has the option to have the contractor price one or more individual projects. When the City requests pricing for an individual JOC project, it becomes the JOC Contractor's responsibility to identify all the tasks and quantities from the CTC that are required to complete the project (e.g. doors, drywall, paint, conduit, j-boxes, lights, etc...). The final price for the project is equal to the fixed contract price in the Construction Task Catalog for each item times the number of units needed times the Adjustment Factor. The adjustment factor for regular work from the recommended vendor is 0.98, i.e. the contractor is discounting the CTC prices by 2%. As a specific example the following would be a sample of the process and calculations for the installation of an interior wall (10' x 20' on two sides painted) based on the City of Naperville JOC CTC and the recommended contractor's factor:

1	09	22	16	00 0015	SF	3-5/8" Metal St Runners	ud Char	nnel, 16" On Cer	nter, 18 G	auge, With Tracks And		\$482.16
						Quantity		Unit Price		Factor	Total	
					Installation	200.00	x	\$2.46	x	0.9800 =	\$482.16	
					Studs for dry	wall. 10' high x 2	0' lengti	h = 200 SF				
2	09	29	00	00 0006	SF	5/8" Drywall, C	ne Laye	r, One Face On	Wood O	r Metal Studs Or Furring		\$446.88
						Quantity		Unit Price		Factor	Total	
					Installation	400.00	x	\$1.14	x	0.9800 =	\$446.88	
					Drywall, both	sides of wall. Qt	y = 10' ł	high x 20' long	x 2 sides	s = 400 SF		
3	09	29	00	00 0046	SF	Tape, Spackle	And Fin	ish Drywall Wall	s Up To '	10' Height		\$223.44
						Quantity		Unit Price		Factor	Total	
					Installation	400.00	x	\$0.57	х	0.9800 =	\$223.44	
					Finish drywa	ll, both sides of v	vall. Qty	r = 10' high x 20	long x	2 sides = 400 SF		
4	09	91	23	00 0062	SF	Paint Interior P	laster/D	rywall, 1 Coat P	rimer, Bru	ush/Roller Work		\$219.52
						Quantity		Unit Price		Factor	Total	
					Installation	400.00	x	\$0.56	х	0.9800 =	\$219.52	
					Prime drywa	ll, both sides of w	all. Qty	= 10' high x 20	' long x 2	sides = 400 SF		
5	09	91	23	00 0064	SF	Paint Interior P	laster/D	rywall, 2 Coats F	Paint, Bru	sh/Roller Work		\$450.80
						Quantity		Unit Price		Factor	Total	
					Installation	400.00	x	\$1.15	х	0.9800 =	\$450.80	
					Paint drywall	, 2 coats, both si	des of w	vall. Qty = 10' hi	igh x 20'	long x 2 sides = 400 SF		

Subtotal: \$1,822.80

If the cost for an individual project is acceptable the project would follow the City's standard approval processes and if approved the Contractor is assigned the work. If the cost is not acceptable the City can chose not to award the project and pursue any procurement method it wants.

If the Contractor meets City expectations and does a good job during both the proposal/pricing phase of the project and during the construction phase, the Contractor would be considered a performing Contractor. As long as they continue to meet these standards the City may repeat the process of pricing and possibly assigning projects up to the potential not to exceed award amount of the Contract. There is no obligation to assign projects at any time. There is no minimum contract value; there is only a maximum.

Thus, JOC is a contract that is based on a catalog of fixed pre-priced construction items. When work is needed the contractor prices the work based on the pre-determined fixed prices. The ATTACHMENT 1

Job Order Contracting Consolidated Briefing Memoranda May 27, 2011 Page **3** of **7** 

City then has the option to order the work at that or choosing an alternative method of doing the work, i.e. bidding, RFP, etc... The City always retains the unilateral right to select the procurement methodology that best suits the procurement at hand.

#### JOC has no costs beyond the costs of the work performed.

JOC has no direct costs and, therefore, there is no budget associated with its use. All costs associated with the performance of work is charged to the individual budgeted projects themselves. The only costs incurred as a result of awarding the recommended contract are the costs of the work, if any, performed pursuant to the JOC program.

# • <u>How Much Does JOC Cost?</u>

There is no direct additional cost for the use of JOC; all costs are built into each of the 67,495 unit prices contained in the Construction Task Catalog (CTC). Thus the cost of JOC is simply the cost of any project done with JOC. There is no additional cost beyond the CTC unit prices. Unlike traditional processes where there are costs associated with the development of a specification (the detailed description of the standards work must conform to) work performed under JOC includes pre-written specifications. These specifications minimize the need for the use of an architect or engineer in specification development of small projects and can result in significant savings. Additionally, unlike traditional processes which may or may not require insurance and performance/payment bonds based on the dollar value of the work, all JOC projects are fully insured and bonded, even the small ones. These costs are also included in each individual CTC unit price.

In Briefing 1 we used the example of building a 10 ft. by 20 ft. interior wall to demonstrate the use of the CTC to calculate a cost. The cost was based on the five required construction tasks needed to complete the wall. Using unit prices and the appropriate quantities for each task, we derived a total cost of \$1,822.80. That cost includes compliance with the applicable detailed specifications for wall board, studs, etc. A review of the 5 volumes and almost 6,000 pages of specifications reveals that 23 pages of detailed specifications apply to the example; these are attached for reference. If there was no JOC, a project like this would require the development of a specification for competitive quotes. To have these specifications developed by an architect would conservatively take four to six hours of drafting, at current rates of \$70.00 per hour that results in a cost of ~ \$350.00 plus associated direct charges such as travel, printing and shipping costs. In addition to these necessary costs, the CTC unit prices also include all costs associated with bonds and insurance as well as mobilization, contractor overhead and profit.

# • <u>Where Does the Money Come From?</u>

The money for projects performed pursuant to JOC comes from the budgets for each specific project. The award of the JOC has no separate budgetary impact; obligations are created and expenditures would only occur when and if individual budgeted projects are performed. This is true whether the work is performed pursuant to the JOC contract or any other construction delivery methodology.

# Page: 608 - Agenda Item: J.1. Page 162 - Agenda Item K.1.

Job Order Contracting Consolidated Briefing Memoranda May 27, 2011 Page **4** of **7** 

JOC is not a budgeted item. It is a contract that provides an optional construction delivery method. The cost for an individual project must already be budgeted in either the capital or the operating budget. The wall that we are using as an example would only be considered as a project if it was either budgeted as part of a capital program, e.g. part of a small interior build out project, or if it was part of building maintenance responsibilities or a repair project in the operating budget. Thus, JOC is a contract that is based on the CTC unit prices. Its use is always dependent on the funds being budgeted for each specific project and the City always retains the unilateral right to select the procurement methodology that best suits the procurement at hand.

#### JOC can save the City of Naperville up to 26% over other delivery methods.

JOC saves money in two ways. First, it reduces the level of effort involved in specification design and development. Second, it obtains bulk pricing for small projects. In other words, the can receive the \$2 million contract discount for projects as small as a few thousand dollars.

A recent example demonstrates both of these savings. On April 8, 2010, the City advertised for the Central Park Improvements project; bids were opened on April 26. Bids were received five bidders for this project. The low bidder was awarded the contract at the bid price of \$68,209.75. As a multi-trade project valued under \$100,000, this is a good project to compare with JOC. On the first savings standard, design and bidding level of effort, approximately 100 hours of staff time were devoted to design and development of the bid documents. Under JOC, this effort would be reduced to 40 hours. This savings can reasonably be calculated based on currently contracted rates of \$77.00 per hour for a savings of \$4,200. On the second savings standard the bid came in at \$68,209.75. When priced against the JOC Construction Task Catalogue at the bid discount the JOC price would have been \$60,906.50.

Bid	JOC	Difference
100 hours at	40 hours at	\$4,200.00
~70.00 = \$7,000	$\sim$ 70.00 = \$2,800	
\$68,209.75	\$60,906.50	\$7,303.25
		\$11,503.25 Savings
		through JOC (16.9%)
	Bid 100 hours at ~70.00 = \$7,000 \$68,209.75	BidJOC100 hours at40 hours at $\sim$ 70.00 = \$7,000 $\sim$ 70.00 = \$2,800\$68,209.75\$60,906.50

This is a single example. On a more programmatic basis, the City can look at efforts in other jurisdictions. Normally it is extremely challenging to quantify the potential cost savings of one methodology over another primarily because it means doing the same procurement twice, in different ways, to get the comparison. In 2006, the Los Angeles Unified School District as part of its consideration of JOC hired an independent consultant to do just that. The study results are attached. That study resulted in a conclusion that savings of up to 26% can be shown through the use of JOC over traditional design-bid-build processes.

Based on all available information, it is reasonable to expect JOC to save on a programmatic basis approximately 15-20% over traditional design-bid-build processes when applied to appropriate projects.

It has been suggested that the City should be bidding everything because prices are declining over time. There are two simple answers to this concern. First, there is no obligation to use JOC; if prices go down, the City stops using the tool. The second is that, while the City has been successful in negotiating no-increase extensions with existing vendors, both our bidding ATTACHMENT 1

Job Order Contracting Consolidated Briefing Memoranda May 27, 2011 Page 5 of 7

experience and the economic indicators suggest that, while the rate of increase has certainly slowed, actual costs have increased, even over the past few years. Since 2006 the US Department of Labor, Bureau of Labor Statistics Construction Cost Index has increased 25.8%, our experience indicates increases in prices at a lower rate, between 9% and 15%. Staff does not anticipate a significant economic change that would reverse a trend that has remained generally consistent for decades; but, if there is, we simply stop using JOC, as there is no minimum order. The City always retains the unilateral right to select the procurement methodology that best suits the procurement at hand.

#### JOC can save the City of Naperville up to 90% of the time it takes to get a project started.

One of the primary features of JOC is its ability to offer faster response time to City needs. There are two reasons. First, because there are agreed units of work and specifications already in place the need to design projects is greatly reduced. Second, because the work is already priced, there is no need to bid the work. This results in a substantial savings in procurement time.

We just used the Central Park Improvements project as an example of cost savings. Let's see if JOC would have also saved time. On April 8, 2010, the City advertised for the Central Park Improvements project; bids were opened on April 26. On the first time savings standard, design effort, approximately 100 hours of staff time were devoted to design and development of the project's bid documents. Under JOC, this effort would be reduced to 40 hours. These savings would have accelerated the project by three to four weeks. On the second time savings standard procurement time, the bid and award for the Central Park Improvements were expedited and, even with this expedited bid, took three weeks. Two of the three weeks would have been saved under JOC. Thus, the project could have been started five to six weeks sooner under JOC. When combined the cost and time savings would have delivered the project with a 16% cost savings and the project would already be completed, instead of just beginning.

This is a single example of an expedited project. On a programmatic basis, the following graph illustrates the expected time savings associated with JOC projects in the normal course of business:

# Page: 610 - Agenda Item: J.1. Page 164 - Agenda Item K.1.

Job Order Contracting Consolidated Briefing Memoranda May 27, 2011 Page **6** of **7** 

Thus in addition to 15% to 26% cost savings, JOC, on average, can be expected to enable Staff to deliver project start times 90% faster than traditional procurement methods. This enables the City to be more responsive to the needs of the community.

#### JOC offer significant additional benefits to the City of Naperville.

So far we have established that JOC can save on average 15 to 26 percent of the dollars spent on appropriate construction work and 90 percent of the time getting the work to its start date. These are significant savings; however, JOC offers the City additional opportunities. Because JOC is a performance-based contract and because of the design of the solicitation document, the City can enjoy additional, significant benefits:

- 1. Automatic Performance/Payment Bond protection and Insurance protection on all projects no matter the size of the project
- 2. Higher quality work
- 3. Higher utilization of Naperville contractors.

Because the entire JOC program is bonded and insured, JOC insures that the City is protected on even the smallest projects. By bringing these protections under the larger contract, the costs associated with smaller projects are reduced. In addition, projects that fall below the mandatory coverage levels will be covered never-the-less. This increases the City's level of security at no additional cost.

JOC, by design, produces higher quality work because it is performance based. The City can stop using JOC at any time. This creates an incentive for the contractor to exceed the City's expectations on each project knowing that if they disappoint they lose the full value of the contract. This is significant leverage; such leverage is simply not available for small projects through any other procurement delivery methodology.

JOC provides the opportunity for greater utilization of local contractors because utilization of Naperville contractors is both a performance and scored criterion in the vendor Request for Proposals process. In order to meet the City's expectations under the contract, the JOC contractor must actively seek to include Naperville contractors in their projects. If they do not, they get no more work. The recommended vendor was selected, in part, because they had the best program for utilization of Naperville contractors. Their program will include active outreach to the local community. It's current vendor list includes 67 Naperville vendors and is growing all the time.

In summary, in addition to saving 15-26 percent in costs and 90 percent in time to construction, JOC provides higher quality bonded and insured projects with higher levels of Naperville contractor involvement. If these standards are not met, please remember the City is under no obligation to use JOC.

Job Order Contracting Consolidated Briefing Memoranda May 27, 2011 Page 7 of 7

#### JOC has no impact on current City of Naperville practices and approval processes.

The JOC does not impact budget, contract or approval requirements for the City of Naperville in any way. Projects delivered through JOC must be budgeted. The City's standard approval requirements will apply to JOC projects. Thus, assuming that a project is budgeted, projects valued less than \$25,000 will require the Chief Procurement Officer's approval, those more than \$25,000 and less than \$100,000 require City Manager approval and any project more than \$100,000 will require City Council approval. No one person or department can approve a project for JOC. There is no change to the controls on spending authority (budget) and there is no change to the review and approval of awards (procurement). All existing approval requirements for projects will continue to apply.

Throughout the six briefing memoranda the phrase "appropriate projects" has been used several times. While there is no hard and fast definition of an appropriate project, the following list gives guidance concerning the types of projects that may benefit from the JOC process. As described above all decisions to use JOC must be approved in advance by the appropriate authority:

- 1. A JOC project must be a construction project.
- 2. JOC projects are generally multi-trade projects equal to or less than \$100,000 (classified as small-to-medium-size repair and rehabilitation work). Good JOC candidates include:
  - Time sensitive projects
  - Projects whose scope of work is replacement in kind
  - Backlog projects that keep getting pushed to the side so the City can focus resources on procuring higher priority, more important projects
  - Emergency work
  - Projects that require phasing due to construction operations
  - Projects that are easily designed or defined with a scope of work. The JOC contractor is able to assist in the scope discussions and offer solutions to finalizing the scope of work.
  - Safety issue projects. These projects arise during critical times. Examples could be public, environmental or city employee work areas. Generally speaking, these projects do not constitute emergency, however the situation requires immediate attention.
  - Projects that do not require 100 percent design

In summary, the types of projects identified above, if approved for JOC use by both the using department and the appropriate award authority, may by delivered with anticipated savings of 15-26 percent, time savings of up to 90 percent, higher quality, enhanced security through bonding and insurance and greater levels of Naperville contractor involvement.

# **RECOMMENDATION:**

Staff recommends that this Memorandum be distributed to the City Council.
