**BACKGROUND:**

The Electric Utility maintains an inventory of insulated conductors for use throughout the year based on anticipated needs for various projects and emergency repairs. The conductors are of various types and sizes and are used in the extension and/or replacement of electric distribution underground infrastructure to ensure the availability of an electric power supply to customers.

In May 2023, the Electric Utility issued Bid 23-124, Insulated Conductors, to contract with a vendor to supply conductors for inventory at the Electric Service Center warehouse. Due to market conditions, this material is not planned to be delivered until 2024.

Bids were received from the following vendors:

Vendor Name	Proposed Cost
Universal Utility Supply	NON-RESPONSIVE
The Okonite Company	\$3,688,836
Wesco Inc.	\$4,619.890
Fletcher Reinhardt Company	\$7,051,560

Four bids were received for insulated conductors. Universal Utility Supply was deemed non-responsive. Procurement staff reached out to the vendor to confirm pricing and the vendor confirmed they mistakenly submitted incorrect costs, which made them the second lowest bidder.

The term of this contract is one year from the date of award to May 31, 2024, with one, one-year option to extend.
