BACKGROUND:

In April 2018, the Electric Utility issued Bid 19-134, Palo Alto Firewall Upgrade, to secure a vendor to provide new Palo Alto firewalls, licensing and support services to the Utility. This equipment will replace end of life equipment and enable the Utility to more clearly identify threats to its networks. These devices will be placed at key points in the Electric Utility's network to secure its supervisory control and data acquisition (SCADA) and Smart Grid networks from cyber-attacks.

Deployment of this equipment will be completed by Electric Utility staff prior to the Utility's scheduled cyber security audit later this year and subsequent release of the Utility portal.
