BACKGROUND:

The City often needs land surveying services in order to successfully complete its projects. These services may be required during the planning, design, and/or construction phases of a project or development. The City, however, does not have sufficient staff or the technical expertise necessary to perform these services in-house and must contract with licensed professional land surveyors.

In December 2022, staff from the Transportation, Engineering and Development (TED) Business Group, Electric Utility, and Water Utilities issued RFQ 22-249, Land Surveying Services, seeking to select a shortlist of qualified and experienced firms for land surveying services. The shortlist of vendors resulting from this result for qualifications will be used on an as-needed basis as other projects arise.
