BACKGROUND:

In March 2021, the Transportation, Engineering and Development (TED) Business Group issued Bid 21-005 seeking a contractor to perform micro-surfacing and thermoplastic marking removal and replacement in various locations. With this is an annual program the City will micro-surface and restripe approximately 14 miles of roadway.

As part of this year’s program, the contractor will apply a high-density mineral bond to the cul-de-sacs located in the subdivisions scheduled for micro-surfacing. The high-density bond significantly extends the life of the pavement, costs less, and continues to yield a better finish than the micro-surface in a cul-de-sac application. The streets highlighted in both green and yellow on the attached map are included in the 2021 program.
